DEDICATED TO LATE AAI BABA
AND ABHI MAMA
This thesis is the culmination of my journey of Ph.D which was just like climbing a high peak step by step accompanied with bitterness, hardship, frustration, encouragement and trust. When I found myself at top enjoying the feeling of fulfillment, I realized though only my name appears on the cover of this dissertation, a great many people including my well-wishers, my friends, colleagues and various institutions have contributed to accomplish this huge task. Though it will not be enough to express my gratitude in words to all who helped me, I would still like to give many, many thanks to them.

At this moment of accomplishment I am greatly indebted to my research guide, Dr. Amrita Bajaj, Former Professor of Pharmaceutics, C. U. Shah College of Pharmacy and Professor, SVKM’s BNCP, who accepted me as her PhD student and offered me her mentorship, motherly love and care. This work would not have been possible without her guidance and involvement, her support and encouragement on daily basis from the start of the project till date. Under her guidance I successfully overcame many difficulties and learnt a lot. Her own zeal for perfection, passion, unflinching courage and conviction has always inspired me to do more. She has taught me another aspect of life, that, “goodness can never be defied and good human beings can never be denied”. For all these, I sincerely thank her from bottom of my heart and will be truly indebted to her throughout my life time.

My earnest thanks to Dr. Najib Babul and Dr. Danny Kao, Relmada Therapeutics Inc, USA, for supporting and sponsoring this project. I am grateful for their valuable advice, constructive criticism, positive appreciation and counsel throughout the course of the investigation which led to the successful completion of the research work.

No research is possible without infrastructure and requisite materials and resource. For this I extend thanks to Dr. S Y Gabhe Former Principal, Dr. K K Singh, Principal and Dr. Supriya Mahajan, Principal Incharge, C. U. Shah College of Pharmacy for providing me with the requisite institutional facilities throughout my research tenure.

I greatly appreciate and acknowledge the support received from few institutions and laboratory. Most of the results described in this thesis would not have been obtained without them. Dr. Harish Ahuja, Senior consultant pathologist and Dr. Vibhuti Mani, Head, Biochemistry Laboratory, Jaslok Hospital, Mumbai, for providing facilities for determining osmotic pressure, Dr. Shailesh Singh, Vice President and Dr. Dhanraj Amin, General Manager, Ajanta Pharma, Mumbai for permitting to compress tablets, Dr D P Chaudary, Haffkines Institute, Mumbai for carrying out Histopathological examinations.

I acknowledge the kind gesture of Dr. Vilasrao Kadam, Principal, and Mr. Abhay Shirole, BharatiVidyapeeth College of Pharmacy, Mumbai for carrying out the DSC studies of my samples. I am equally thankful to Mrs. Manjusha, Director, Dr. Joag, Former Director, Ms. Vaishali from M.K, Rangnekar labs and Dr. Shoba Udipi, Director, SVT College, SNDT Women’s University, Mumbai for carrying out IR analysis and helping in HPLC studies. I am thankful to Mrs. Shilpa Chalke, Tata Institute of Fundamental Research for helping me carry out SEM studies. I sincerely thank Dr. Manish Rane, Colorcon, Mr. Vikas Rane, Degussa for providing me with samples of excipients for the research work.

I am grateful to Dr. Rajani Athawale, Associate Prof. of Pharmaceutics, Dr. Pratima Tatke, Dr. Milind Bistre, C.U.Shah College of Pharmacy and Mrs. Aarti Alshi, HOD and Professor of Pharmaceutics, P V Polytechnic, SNDT University, Mumbai for their support, understanding, encouragement and love when it was most required. All the Non-teaching staff have helped me and thanks are due to all of them for their silent contributions in particular Mrs. Saki, Mr. Ashok, Mane, Deepak, Vinod, Sujata, Sharad, Kulkarni, Sudhir, Hasmukh, Jayesh, Santosh, Sadanand, Ramesh and Sameer.
Special thanks are due to Dr. Kalyana Sundaram, Former V.P (Medical Affairs), Unimark Remedies for being a constant source of encouragement and guidance and being with me during my crisis period.

It’s my fortune to gratefully acknowledge the support of a special individual and dearest friend, Anjali S for her support and generous care throughout the research tenure. She was always beside me during the happy and hard moments to push me and motivate me and Roopali B for her scientific inputs, personal help and friendly nature has always made me feel at ease with her and I could always look back to her for any support during my course of Ph.D. Special thanks are extended to Meghana M, Rajeshri W, Rupali K, Prabha S and Medha P. A very special gratitude to all friends Rahul, Sujit, Vishant and Faisal for being with me as a strong support and motivation throughout my journey. Big thanks to all my fellow colleagues and friends, particularly, Rekha S, Priyanka P, Shraddha S, Mamta, for their co-operation and support.

My acknowledgement will never be complete without the special mention of my dearest friends, Vikas for being with me in thick and thin of life and Mr. Ashutosh Anmadwar for his constant advice, friendly nature and elderly support, which made a lot of difference to me personally as well as professionally. Both have made me realize what I had only heard, “When the going gets tough, the tough gets going”. I will never find words to tell what I owe to them, and if I start doing it, I would not know where to stop…thanks for everything you both....

I also owe immense thanks to my dear friend Dr. Prahar for his sincere encouragement and inspiration throughout my thesis writing and for his extended help going out of the way thus making it easy lifting me uphill this crucial phase of life. His attitude of living every moment as it comes, making serendipitous observations and converting them to new possibilities, correlating ideas and understanding the obvious has helped me come a long way and will always guide me in future.

Finally, I would like to acknowledge the people who mean the world to me, my parents, Aai and Baba, my uncle Abhi Mama, my brothers and sisters for showing faith in me and giving me liberty to choose what I desired. Aai Baba and Abhi Mama I salute you all for the selfless love, care, pain and sacrifice you did to shape my life. You provided me with a care free environment, so that I could concentrate on my studies. Although you hardly understood what I researched on, you were willing to support any decision I made. You told me that all I need to do is focus on my study and leave other things to them. Their extreme sacrifice is reflected during the car accident to an extent that they must have prayed God to save my life and take theirs in return so that I could complete our dream to be a Doctorate in Pharmaceutics. I would never be able to pay back the love and affection showered upon by my Aai.

I would like to pay high regards and thanks to my dearest, Maanas, Aaarya, Aaayush, Avanish, brother Manoj R., my sisters Mamta, Mausmee, my sister-in-law Manasi and brother-in-laws Ajit K. and Amar P who have helped me stay sane through these difficult years. Their support and care helped me overcome setbacks and stay focused on right from my research work to completion of the thesis. I greatly value their contribution and deeply appreciate their belief in me. I consider myself the luckiest in the world to have such a supportive family, standing beside me with their love and support. I extend my respect to my paternal and maternal grandparents and all elders in the family. I don’t imagine a life without their love and blessings. Particularly my cousins Smita tai and Swapnil, Suryakant (Babya Mama), Sanjay Kaka who have knowingly and unknowingly helped me in the successful completion of this project.

I thank the Almighty for giving me the strength and patience to work through all these years so that today I can stand proudly with my head held high.

Meenal Mukund Rane
