Acknowledgements

This research is a result of more than four years of unrelieved journey in Nanda Devi Biosphere Reserve and significant contributions of many people. I received invariable guidance, support and debts from many persons in different forms knowingly or unknowingly throughout the journey of this research. It gives me immense pleasure that I now have an opportunity to express my gratitude and feelings to all of them through acknowledgement, who became part of my life during the course of this research. Though, it is beyond my capability to repay their contributions in words.

First and foremost, I express my sincere gratitude to Dr. R.B. Singh for supervising this study. His valuable suggestions, guidance and continuous encouragement at every step of this research have taken it to its accomplishment. His keenness and integral view on present research and mission for providing 'only high-quality research and not less' has made a deep impact on me. I wish to extend thanks to Dr. Anu Kapur; Head of the Department and other faculty members for their support. I am grateful to the Department of Geography, Delhi School of Economics, where I got the platform to precede my research work.

I appreciate valuable suggestions and critical comments of Dr. M.P.S. Bisht, Dr. Manish Mehta, Dr. D.P. Dobhal, Dr. Surender Singh and Niti Bhushan Mishra. I would like to thank the Ratan Tata Library, Wadia Institute of Himalayan Geology, LPDAAC and GLCF for their kind help during the data and literature consultation.

Present research would have been impossible without Basic and Advanced Mountaineering training at the Atal Bihari Vajpayee Institute of Mountaineering and Allied Sports, Manali. It helped me to survey rarely travelled and extremely difficult terrains of NDBR. I survived many close calls and successfully completed the field work due to these courses. The acknowledgement would remain incomplete without acknowledging the people, who accompanied me to the field. My sincere thank to Ashutosh Mishra, who led the team and arranged the logistics for the field survey of 2010 and 2011. I also thank Maninder Kohli for his kind help to arrange both the field works. The acknowledgement to Himalayan Club is also due for sponsoring both the field works. I also express my gratitude to all the members of support team. I am also thankful to ITBP, Forests Department and SDM for permission to survey the ‘forbidden areas to civilians’ close to India’s international boundary and their attempts rescuing us in 2011.
I am greatly indebted to all the members of my research group including Pankaj Kumar, Swarnima Singh, Ajay Kumar Gurjar and others for thorough discussions on present research. I also wish to acknowledge the help of Virender Singh Rana, Praveen Mishra, Manish Kumar and Manu Sharma regarding field experiences and software assistance. I thank Narain and Pawan Kumar for their kind help in using statistical methods. I appreciate contributions of all the faculty members of Geography Department at Shaheed Bhagat Singh College, Vinay Kumar, Ashutosh Chaudhary and all my other friends and family members, who helped me in every possible way and provided moral support for present research.

Suraj Mal
