ACKNOWLEDGEMENTS

The completion of any project marks the beginning of a new chapter - that of the expression of gratitude to various people involved in the venture. The present thesis might bear my name but it is in fact a collaboration of many people who worked behind the scenes in making the effort a success. My humble offering to them and their efforts is a heartfelt acknowledgement. I am deeply indebted to my guide, Dr. Bikramjit Singh Maan for his unstinting support and lucid vision. His experience in the field and his patience in dealing with my incessant queries went a long way in clearing my doubts. If there is clarity of thought in the thesis it is entirely due to his expertise. I would also like to express my gratitude to his wife, Mrs. Bimal Maan who always met me with good cheer and never made me feel I was impinging upon their time.

My gratitude also extends to Dr. Balwinder Singh, H.O.D., C.B.M. Department, GNDU, who showed faith in me and my project, thus providing the much-needed faith which at times showed signs of flagging. I also appreciate my teachers in the CBM Department whose influence and involvement in my research was a constant source of inspiration.

I am also indebted to my husband, Gurpartap Singh who not only bolstered my courage and hope but also painstakingly went through many drafts of the thesis, weeding out the many errors and inconsistencies, making the thesis easy to read and understand. My mother-in-law, Mrs. Urmila Khairah also deserves a mention as she took over the household chores without complaint and constantly encouraged me to devote my time to research.

Thanks are also due to my father, Dr. Mahinder Partap Satija. An academician to the core, he exorted me to pursue Ph. D. I also thank my mother Mrs. Amrit who, with fond chidings and genuine affection, motivated me to complete my research.
The true mettle of friends comes to the fore in trying times and I came to know and appreciate the genuine concern and steadfastness of my friends, especially Dr. Mrs. Amardeep Kaur Ahluwalia who was with me at every step and stage of the thesis. She was and is a great morale booster.

Most of the part-time researchers find it difficult to cope with the burden of their jobs and their research. But I was singularly lucky in this respect as my Principal Dr. Sukhbir Kaur Mahal encouraged me to give priority to my research and helped me in every possible way. My friends and colleagues at work also deserve a special mention as they provided not only moral support but also the much needed respite in such a work;

I am also indebted to the staff of Bhai Gurdas Library who assisted me in every possible way and resolved all my queries with a courteous smile. I would be failing if I do not acknowledge the efforts of Sh. Amrit Pal Sehra of P.A.U. who helped me with the statistical and analytical aspect of the research.

I dedicate this thesis to my daughters Arunima and Srijna who put up with my occupation with the research and willingly sacrificed the time that was their due.

No task can ever be begun or completed without the blessings of the Almighty. Had it not been for His benign sanction, I would not have been able to undertake this project.

Namrata
