# Contents

1 Introduction and Preliminaries  
1.1 Order of Magnitude of Fourier Coefficients 1  
1.2 Absolute Convergence 18

2 Multiple Trigonometric Fourier Coefficients 29  
2.1 Order of magnitude of multiple trigonometric Fourier coefficients of functions of bounded $p$-variation 29  
2.2 Order of magnitude of multiple trigonometric Fourier coefficients of lacunary series of functions of bounded $p$-variation 41

3 Walsh Fourier Coefficients 50  
3.1 Order of magnitude of Walsh Fourier coefficients of functions of generalized bounded variation 50  
3.2 Order of magnitude of Walsh Fourier coefficients of series with small gaps for functions of generalized bounded variation 56  
3.3 Order of magnitude of multiple Walsh Fourier coefficients of functions of bounded $p$-variation 61  
3.4 Order of magnitude of multiple Walsh Fourier coefficients of series with small gaps for functions of bounded $p$-variation 66

4 Vilenkin Fourier Coefficients 71  
4.1 Order of magnitude of Vilenkin Fourier coefficients of functions of generalized bounded fluctuation 71  
4.2 Order of magnitude of Vilenkin Fourier coefficients of series with small gaps for functions of generalized bounded fluctuation 80
5 Absolute Convergence Of Vilenkin Fourier Series

5.1 Absolute convergence of non-lacunary Fourier series of functions of generalized bounded fluctuation on Vilenkin groups 89

5.2 The Wiener-Ingham type inequality and its application to harmonic analysis 96

5.3 Absolute convergence of lacunary Fourier series of functions of generalized bounded fluctuation on Vilenkin groups 105
