3. Materials and Methods

3.1. Incidence of HPVs in fish and fish products
   3.1.1. Source of samples
   3.1.2. Iced samples
   3.1.3. Frozen fish and fishery products

3.2. Preparation of samples
   3.2.1. Iced Samples
   3.2.2. Block frozen and IQF samples

3.3. Bacteriological analysis of the sample

3.4. Studies on morphological, cultural and biochemical characteristic of the isolated pathogens
   3.4.1. Morphological characteristics
   3.4.2. Motility
   3.4.3. Cultural characteristics
   3.4.4. Oxidation and fermentation of glucose
   3.4.5. Carbohydrate fermentation
   3.4.6. Cytochrome oxidase
   3.4.7. Indole production
   3.4.8. Methyl red test
   3.4.9. Voges- Proskauer test
   3.4.10. Nitrate reduction
   3.4.11. Gelatinase production
   3.4.12. H$_2$S$^-$and gas production
   3.4.13. Amino acid decarboxylation
   3.4.14. Citrate test
   3.4.15. O/129 pteridine sensitivity

3.5. Effect of washing on HPVs
   3.5.1. Organism used
3.5.2. Substratum used for inoculation and its preparation 48
3.5.3. Preparation of bacterial suspension 48
3.5.4. Inoculation of the organisms in to the prawns 48
3.5.5. Washing of prawns inoculated with HPVs 48
3.5.6. Enumeration of HPVs after each wash 49
3.5.7. Determination of the load 49

3.6. Effect of chilling on HPVs 49
3.6.1. Organisms used 49
3.6.2. Substratum used for inoculation and its preparation 49
3.6.3. Preparation of bacterial suspension 49
3.6.4. Inoculation of the organism in to the prawns 49
3.6.5. Chilling of prawns inoculated with HPVs 49
3.6.6. Enumeration of HPVs during chilling 50
3.6.7. Determination of the load 50

3.7. Effect of low temperature (4°C and 10°C) storage on HPVs 50
3.7.1. Organisms used 50
3.7.2. Substratum used for inoculation and its preparation 50
3.7.3. Preparation of bacterial suspension 50
3.7.4. Inoculation of the organisms in to the prawn homogenate 50
3.7.5. Exposure of the HPVs to low temperature 50
3.7.6. Enumeration of HPVs 51

3.8. Effect of freezing (−40°C) and frozen storage (−20°C) on HPVs 51
3.8.1. Organisms used 51
3.8.2. Substratum used for inoculation and its preparation 51
3.8.3. Preparation of bacterial suspension 51
3.8.4. Inoculation of the organism in to the prawns 51
3.8.5. Exposure of HPVs to freezing and frozen storage temperatures 51
3.8.6. Enumeration of HPVs after freezing and frozen storage 51
3.9. Effect of drying on HPVs 52

3.9.1. Effect of sun drying 52

3.9.1.1. Organism used 52
3.9.1.2. Substratum used for inoculation and its preparation 52
3.9.1.3. Preparation of bacterial suspension 52
3.9.1.4. Inoculation of the organism into the fish 52
3.9.1.5. Drying the sample 52
3.9.1.6. Enumeration of HPVs 52

3.9.2. Effect of salt curing and sun drying 53

3.9.2.1. Organisms used 53
3.9.2.2. Substratum used for inoculation and its preparation 53
3.9.2.3. Preparation of bacterial suspension 53
3.9.2.4. Inoculation of the organism into the fish 53
3.9.2.5. Curing and sun drying 53
3.9.2.6. Enumeration of HPVs during drying 53

3.10. Effect of blanching on different species of HPVs 53

3.10.1. Organisms used 53
3.10.2. Substratum used for inoculation and its preparation 54
3.10.3. Preparation of bacterial suspension 54
3.10.4. Inoculation of the organism into the prawns 54
3.10.5. Blanching of prawns inoculated with HPVs 54
3.10.6. Enumeration of HPVs 54

3.11. Effect of sodium chloride on HPVs 54

3.11.1. Organisms used 54
3.11.2. Substratum used for inoculation and its preparation 54
3.11.3. Preparation of bacterial suspensions 54
3.11.4. Inoculation of the organism into the broth 54
3.11.5. Incubation of the inoculated tubes 54
3.11.6. Enumeration of HPVs

3.12. Effect of pH on HPVs
  3.12.1. Organisms used
  3.12.2. Substratum used for inoculation and its preparation
  3.12.3. Preparation of bacterial suspension
  3.12.4. Inoculation of the organism
  3.12.5. Incubation of the inoculated tubes
  3.12.6. Enumeration of HPVs

3.13. Effect of chlorine and chlorine dioxide on HPVs
  3.13.1. Effect of chlorine
    3.13.1.1. Organisms used
    3.13.1.2. Substratum used for inoculation and its preparation
    3.13.1.3. Preparation of bacterial suspension
    3.13.1.4. Inoculation of the organisms
    3.13.1.5. Chlorination of the water samples
    3.13.1.6. Enumeration of HPVs subjected to different chlorine levels
  3.13.2. Effect of chlorine dioxide
    3.13.2.1. Organisms used
    3.13.2.2. Substratum used for inoculation and its preparation
    3.13.2.3. Preparation of bacterial suspension
    3.13.2.4. Inoculation of the organism
    3.13.2.5. Addition of ClO₂ to the water sample
    3.13.2.6. Enumeration of HPVs subjected to different chlorine dioxide levels

  3.14.1. Organism studied
  3.14.2. Antibiotics used
  3.14.3. Sensitivity testing
3.15. Haemolytic activity of HPVs
   3.15.1. Different species of HPVs used for the study 58
   3.15.2. Medium used 58
   3.15.3. Preparation of washed human erythrocytes suspension 59
   3.15.4. Preparation of broth culture, incubation and spotting 59

3.16. Media formulae and preparation 59

4. Results and Discussion 67
   4.1. Incidence of HPVs in fish and fish products 67
      4.1.1. Incidence of HPVs in iced samples 75
      4.1.2. Incidence of HPVs in block frozen samples 75
      4.1.3 Incidence of HPVs in IQF samples 78
   4.2. Effect of washing on HPVs 89
   4.3. Effect of chilling on HPVs 91
   4.4. Effect of low temperature storage (4°C and 10°C) on HPVs 94
   4.5. Effect of freezing and frozen storage at –40°C and –20°C on HPVs 105
   4.6. Effect of drying on HPVs 113
      4.6.1 Effect of sun drying on HPVs 113
      4.6.2 Effect of salt curing and sun drying on HPVs 116
   4.7. Effect of blanching on HPVs 119
   4.8. Effect of NaCl on HPVs 121
   4.9. Effect of pH on HPVs in shrimp homogenate prepared with different diluents and incubated at 37°C for 24 h 123
   4.10. Effect of chlorine and chlorine dioxide on HPVs 131
      4.10.1 Effect of chlorine 131
      4.10.2 Effect chlorine dioxide (ClO₂) on HPVs 138
   4.11. Antibiotic sensitivity of HPVs 143
   4.12. Haemolytic activity of HPVs 147
