ACKNOWLEDGEMENT

I would like to express my grateful thanks to all the people who have contributed in so many ways to the writing of this thesis.

At the outset I express my deep sense of gratitude and thanks to my honourable supervisor, Dr. Promila Singh. She gave me the benefit of her valuable time and experience, helping and advising me throughout and lifting me over roadblocks which would have been insurmountable without her help and guidance. I am indebted to her. I am deeply thankful to Dr. B.G. Singh, who was always ready to help me with advice and inputs.

This work has been possible because of the blessings of my parents and parents-in-law. The support rendered by them, especially by my parents-in-law helped me to actively pursue this research so that I could complete it on time. My husband Himadri and children, Devaditya and Mrinmayi have helped me in many ways, small and big, and have been a necessary part of this endeavour.
I would like to acknowledge the help and co-operation of Mr. & Mrs. L.D. Das, Mr. G.M. Arun Kumar, Mr. Yusuf Ali and Mr. Chaitanya V. My friend Dr. G.S. Bajpai motivated and encouraged me in this endeavour, especially when he saw I was not putting in the effort required initially. His support and co-operation has been invaluable. My thanks to Mrs. Lakshmi Krishnan, who has been with me through out this period of hard work. A special word of thanks for Dr. N. Mohapatra, who has helped me in all the phases of this research work and gave me valuable suggestions. Lastly, I would like to express my gratitude to all the senior executives of Bhilai Steel Plant who have helped me in the process of data collection.

Without the help of my guide, family and friends, this thesis would not have been written with so little agony and so much pleasure.

Mrs. Debjani Mukherjee.
