ACKNOWLEDGEMENT

It is my pleasant and important duty to acknowledge the obligations of friends and well wishers; without whose help and cooperation I could not have accomplished the task.

I take this opportunity to express my deep sense of gratitude to Prof. S.G. Tandon, Head, Department of Chemistry, Ravishankar University, Raipur, for providing all the facilities of space and experimentations. My thanks are also due to the authorities of Ravishankar University, Raipur, for the award of Research Fellowship for the period March 1988 to November 1990.

I am extremely grateful to Dr. J.S. Tiwari, Reader, Department of Chemistry, Ravishankar University, Raipur, and Dr. H.S. Kar, Assistant Professor, Department of Chemistry, Govt. Autonomous Science College, Raipur, for their valuable suggestions and constant criticism of the work.

It is a pleasure to record my thanks to Dr. M. Shankar Das, Ex-Head, Analytical Chemistry Division, BARC, Bombay, for assistance rendered in surface area determination of alumina samples.

I would like to express my appreciation to Mr. T.V. Divakaran, who has meticulously typed the entire Thesis, with utmost care; Mr. G.V. Mavlankar for sketching the graphs; Mr. Prebhat Chand for his keen efforts to provide
neat xerox copies of the figures, tables and other matter of the text.

I would like to thank (Mr.) Ram Mani Sharma, (Miss) Parminder Kaur, (Mrs.) Lovina Phir, (Mrs.) Neeta Tiwari, the research fellows, for their cooperation and keen interest during the course of this work. I am indebted to a number of people from whom I have been able to learn, whether formally or in friendly discussions.

The warm affection and blessings of Mrs. Mundhara has always encouraged me to pave a smooth path. I am deeply indebted to my reverend mother-in-law and parents whose blessings have enabled me to pursue the work. I am also thankful to my husband for showing keen interest in my work and encouraging me to complete the same.

Finally, I shall be failing in my duties, if I do not express my deep sense of gratitude and indebtedness to Dr. G.L. MUNDHARA, Reader, Department of Chemistry, Ravi- Shankar University, Raipur for suggesting the topic of this dissertation, and without whose painstaking supervision, inspiring discussions, unsparing and ever-available help, during the course of investigation, this thesis would not have seen the light of the day.
