ACKNOWLEDGEMENT

First and foremost, I would like to offer my prayer to God, who has blessed me with the strength and intellect to pursue this research work.

Every completed task has got many hands to accomplish it. Mere mention of them will not justify their true contribution. Indeed, the words at my command are not adequate in spirit to convey the depth of feeling and gratitude to my beloved Guide Prof. E. Jayachandran for his benevolent and expert guidance, constant encouragement, stimulating discussion and untiring help given during the planning and execution of this investigation. He has been a constant and consistent source of strength, sharing my concerns by enriching them with his own perception. I am proud to say that he is just like a velvet hand in an iron glove and a dazzling diamond in disguise.

A special word of thanks to Prof. K.R.S. Sambasiva Rao, Chairperson, Board of study, Department of Biotechnology, Acharya Nagarjuna University, Guntur, Andhrapradesh, for his constant inspiration, motivation and full-fledged support to strengthen me all through the entire dissertation work.

I wish to thanks to Prof. P. Sudhakar, Co-ordinator, Department of Biotechnology in Acharya Nagarjuna University, Guntur, for his kind support and valuable suggestion.
