ACKNOWLEDGEMENTS

The studies presented in this thesis were carried out at the Division of Radiobiology & Toxicology, Manipal Life Sciences Centre, Manipal University, and there are a large number of people that have contributed in various ways to this work and I want to express my deepest gratitude to you all.

First and foremost I wish to express my sincere thanks and gratitude to my guide Dr. B S Satish Rao, Professor and Head, Division of Radiobiology & Toxicology, Manipal Life Sciences Centre, for all the hope and trust he has put on me, even before I thought I could do any research at all. He has taught me, both consciously and unconsciously, how good research is performed, both at the lab and when it comes to writing scientific papers. I appreciate all his contributions of time, ideas, and funding to make my Ph.D. experience productive and stimulating. The joy and enthusiasm he has for research was contagious and motivational for me, even during tough times in the Ph.D. pursuit. Sir, thank you for everything!

I would also like to thank my co-guide Dr. N Udupa, Principal, Manipal College of Pharmaceutical Sciences, for his supervision, guidance and support which always propelled me to perform better and helped me to give my best.

I would also like to express my sincere gratitude to Dr. K Satyamoorthy, Director, Manipal Life Sciences Centre and Dr. P M Gopinath, Senior Scientist, Manipal Life Sciences Centre for their constant support, encouragement and guidance throughout my Ph.D. tenure.

I also wish to thank Dr. Gautham Shenoy, Professor, Department of Pharmaceutical Chemistry, Manipal College of Pharmaceutical Sciences, for all the valuable suggestions and guidance as a doctoral scrutinizing committee member during the course of my Ph.D. work.

I am very grateful to Dr. Ramdas M Pai, President, Dr. H. S. Ballal, Pro Chancellor, Dr. K Ramnarayan, Vice Chancellor, Dr. G K Prabhu, Registrar and Dr. Ranjini Kudva, Deputy Registrar, Manipal University, Manipal, for providing me with all the research and academic facilities to carry out this work.

I wish to thank Dr. Shyam Prasad Sajankila, Assistant Professor, Division of Radiobiology & Toxicology, for his guidance and inspiration during my study. I would also like to sincerely thank Dr. K K Mahato, Dr. K P Guruprasad, and other faculty members of Manipal Life Science Centre, for their support and encouragement during various phases of my Ph.D. work. I also wish to thank all the faculty members of MCOPS including Dr. Sreenivas Reddy, Dr. Mutalik, Dr. Mallikarjuna Rao, Dr. K K Srinivasan, Dr. K M Bhat, Dr. Varadraj Bhat, Dr. Seenam Pathak for their help and encouragement all throughout my Ph.D. tenure.
I would like to thank Dr. M S Vidyasagar, Professor & Head and Dr. J G R Solomon, Department of Radiotherapy and Oncology, Shirdi Sai Baba Cancer Hospital, Manipal, for providing the irradiation facility and for the radiation dosimetric calculations, respectively. I would also like to thank Dr. Anuradha C K Rao, Associate Professor, Department of Pathology, KMC, Manipal, for her kind help with the analysis of the histological slides.

I would like to thank Indian Council of Medical Research (Government of India), for funding the project entitled “Anticancer and radiosensitizing effect of Plumbagin and its structural analogues: A Preclinical study” where I worked as a Senior Research Fellow for 4 years. Without their funding, this work would not have been possible. I would also like to thank Department of Science and Technology (Government of India) for awarding me the “young scientist foreign travel grant” to attend a conference in USA during my Ph.D. tenure. I would also like to acknowledge Genzyme Pharmaceuticals Inc (Switzerland) for generously gifting me with sufficient quantities of lipid samples needed for my research purposes.

Sunil Kumar M R, my fellow Ph.D. scholar and a project-mate, whom I have known since my M Pharm days, has been extremely co-operative and helpful in the successful completion of this project. His timely suggestions, encouragement and a helping hand in all aspects have given this work the present shape. Sunil, thanks for all your support.

I would like to express my heartfelt thanks to a dearest friend, Nageshwar Rao B, whom I have known since the day I entered this lab. He is one person who has been with me, inspiring and encouraging, through the most difficult as well as the happiest of times during my Ph.D. tenure. The long discussions (or “casual chat” if I may say) that I have had with him (both scientific and otherwise) have made things a lot easier at MLSC. Mama, thanks for all your help and support.

The fellow research scholars from my department including Archana P R, Kamalesh Mumbrekar, Gowtham H V, Vijendra Prabhu, Shubhankar Das, Vasudev Ballal and Rishikesh have all helped in providing a friendly and creative atmosphere during my work. I would also like to thank other seniors including, Ravikiran, Dinesh Upadhya, Sudarshan, Shrikant Patil, Mallikarjun Rao, Subba Reddy, MBCR Naidu and Kalyan Kumar who have all helped me in one way or the other during my initial days in this department.

My heartfelt thanks to my beloved non-academic staff madams of my department, Veda, Sandhya, Geethanjali, Usha and their family members for encouraging me during my study and for being ever ready to lend a helping hand whenever they could. I also appreciate the hard work of the service staff, especially Suresh, Jayasheela, Nayak, Kotian, Kumara, Gangadhar, Ramesha, Heriya and Jayanthi for maintaining the laboratory, animal room, and keeping working environment hygienic and safe.
I can never forget the wonderful time that I spent with the fellow research scholars of MLSC (past and present) including (but not limited to) Chida, Roshan, Patra, Shyam, Raghu, Ashok, Bharath, Shivu, Prabhakara, Sanjiban, Vishwanath, Shashikant, Satish Peri, Ravi, Anantha, Rotti and many others. Guys, thanks for being so cheerful that made my difficult times seem so easy. I would also like to thank my friends from the Laser department for all the help and encouragement including Sajan sir, Unni, Asif, Chetan, Ajith, John, Mridul and others.

I also would like to thank Shashikala, Usha, Harish, Jyothi, Veena and other non-teaching staff of Division of Biotechnology for all their help.

I would also like to acknowledge the support, help and encouragement from the research scholars of MCOPS including Gopal, Aravind, Usha, Praful, Omprakash, Karthik. I would also like to thank Dr. Sunil Agrawal and Dr. Ranjith, my seniors from MCOPS who have helped and encouraged me both during my M Pharm days as well as during my Ph.D. days.

I would also like to thank some of my other friends (most of whom are currently doing their Ph.D. outside India), Raghavan, Sohail, Sachin, Deepthi and Arjun for timely help in sending me the full-text articles that I could not directly access from Manipal. Your contribution in the successful completion of this thesis is immense. Thanks again for all the help.

My heartfelt thanks also go to my dearest friends from outside MLSC (most of who were my classmates during B Pharm days), Harish, Prabhath, Ashok, Govardhan, Raghu, Raffiq, Vathan, and Shahid, for their constant support and encouragement. I would also like to thank some of my M Pharm classmates (most of whom are presently working in major pharma companies) including, Subbu, Siva, Laxman, Mukesh, Ashok, Deepak for helping me in different aspects of my Ph.D. work.

Life during Ph.D. can sometimes be stressful and tough, with all the competitiveness and perfectionism. I have been extremely lucky to have had extensive care, unwavering support and help from my family members specially Papa, Amma, Ashwini, Raghu, Archana and Prathu. Without their help, support and sacrifices, this Ph.D. thesis would not have seen the light of the day. Therefore, with sincere gratitude, I would like to devote this thesis to all of them.

Kiran Aithal B
