3.3.6.2 Supreme Court of India………………………………………………  34
3.3.6.3 Departments of Trade & Industry and Environment,
    Food and Rural Affairs, U.K.................................................  34
3.3.6.4 MARISEC, London...............................................................  35
3.4 Applications of Information Technology.................................  35
3.5 Role of Naval Architects and Classification Societies ...............  37
3.6 Ship Recycling Demand Forecasting......................................  38
3.7 Inference.................................................................................  38

CHAPTER 4         SHIP RECYCLING DEMAND FORECASTING.40-44

4.1 Scope of Demand Forecasting in Ship Recycling......................  40
4.2 Parameters of Ship Recycling Demand..................................  40
4.3 Forecasting Methods and Tools..........................................  41
4.3.1 Qualitative Forecasting Methods......................................  41
4.3.2 Quantitative Forecasting Methods....................................  41
4.3.2.1 Time Series Models....................................................  41
4.3.2.2 Causal Methods.......................................................  42
4.3.3 Critique of the Methods................................................  43
4.4 Implementation of Demand Forecasting Method in Ship Recycling..  43

CHAPTER 5          DEVELOPMENT OF KNOWLEDGE BASED
                  EXPERT SYSTEM FOR SHIP RECYCLING….45 - 114

5.1 Introduction............................................................................  45
5.2 Features of Expert Systems for Decision Support..................  46
5.2.1 Fundamental Elements of Expert System.........................  46
5.2.2 Characteristics of Practical Expert System......................  48
5.2.3 Effectiveness of Expert Systems.......................................  48
5.2.4 Knowledge Acquisition..................................................  49
5.3 Beach Method in Ship Recycling.........................................  49
5.3.1 System Representation of the Beach Method......................  49
5.3.2 Elements of the System..................................................  49
5.4 Expert systems in Marine Applications...............................  55
5.5 Knowledge Base of the Ship Recycling System......................  57
