Greeting

The best and tough moments of my research journey have been shared with many people. This thesis represents not only my work in thin film laboratory but it is a team work of great number of people whose contribution in assorted ways to the research and creation of the thesis during the three years of research from 2009 to 2012 as a Ph. D. student in the Department of Physics at Sardar Patel University. It has been great privilege to express my appreciation to them in my humble salutation.

In the first place I am gratefully indebted to my thesis supervisor **Prof. K. D. Patel** for his valuable and inspiring guidance throughout my research work. There are no adequate word to explain his keen interest, immense patience, kind advice, sustained encouragement, constant help and throughout provoking discussions that I had with him during this time. This thesis is the product of many hours of our critical discussions. I feel very proud and privilege to be his Shishya (student) and consider myself very lucky to work under his guidance. To work under the guidance of such an eminent Guru has been a great and inexplicable experience, which I will ever remember in my life. I am grateful to him for revealing me the richness of my research work. It was a valuable experience to work with and learn so many things from him both as a GURU and as a human being.
I am much indebted to my role model Guru Prof. R. Srivastava Sir for his valuable advice in my research work, spending his precious times and gave his valuable suggestions. I wish to record my special thanks to Prof. V. M. Pathak and Prof. G. K. Solanki for their understanding, encouragement and personal attention which have provided good and smooth basis for my Ph. D. tenure by giving valuable suggestions at various stages of this work of a scientific and academic nature as well.

I am very much thankful to Prof. A. R. Jani Sir - Head, Department of physics and Prof. K. N. Joshipura Sir - former Head, Department of physics, for providing me all the facilities for my experimental research work with valuable guidance added in to feelings of best wishes.

Additionally, I am very much pleased to acknowledge, my teachers of department of Physics, for giving a valuable direction to complete the course work which is a part of my research. Further, I express my deep gratitude and concern for the nonteaching staff members of the department of Physics, and all supporting staff for their kind cooperation during my research work.

Most of the results described in this thesis would not have been obtained without a close collaboration with few laboratories. I owe a great deal of appreciation and gratitude
to Prof. V. S. Patel - Director of Sophisticated Instrumentation Centre for Applied Research and Testing (SICART) - Vallabh Vidyanagar (Gujarat), for providing me analysis facilities like electron microscope and UV - VIS - NIR spectrophotometer in his institution. I am very much thankful to University Scientific Instrumentation Centre for helping me to solve many technical problems occurred during research time. I also thankful to Prof. Vandana Rao of metallurgical department of MSU - Vadodara (Gujarat) for allowing me to use compositional and structural characterization system (EDAX and SEM) in her laboratory. I am also thankful to Prof. T. K. Chaudhory - Director of Dr. K. C. Patel R & D Centre at Charusat University - Changa (Gujarat) for the use of XRD facility.

I could never imagined that I would find such a special and huge research group as well as friends without whom I would be just another sad lonely Ph. D. student, without following any specific order, thanks to my lab-mates Dr. Mayur Patel, Dr. Haresh Patel, Jignesh Rathod, Mihir Jani, Mr. K. K. Patel sir, Rahul Patel, Vimal M. Patel, Ruchita R. Patel, Mr. P. R. Patel sir, Dr. Sandip R. unadkkat, Hiren Bhadja; Chirag Vyas, Vishal Pathak, Prashant Mistry, Kanan Patel, Ishita Chauhan, Sandhya madam, Nirja Patel, Nitin Gosai who always helped me to resolve the each and every research problem of theoretical or experimental nature by standing with me over night in research laboratory. Moreover,
I have special vote of thanks towards the two foreign students named Ms. Ebtesam and Ms. Arwa for improving my academic communication skill.

It is to my deep gratitude towards my childhood friends Ashish Tilava, Ravi Panseriya, Mihir Kansagara, Gaurang Aghera and Jaydeep Khanpara for encouragement and constant support all throughout from my school days to date.

I finish with the most basic source of my life, energy and inspiration resides: my family. I have an amazing family with Mummy - Papa, brothers (Rohit), loving wife (Sangita), sister (Bhumi) and charming baby (Tanvi) who are unique in many ways, and the stereotype of a perfect family in many others. Their support has been unconditional all these years; they have given up many things for me to be at Vallabh Vidyanagar; they have cherished with me every great moment and supported me whenever I needed it.

Thanks to each and every one who has been a part of my life, but I failed to mention. There won’t be enough space if I will mention you all.

Last but foremost I thank almighty GOD, the compassionate, the almighty merciful, who kindly helped me to complete my thesis.

Keyurkumar S. Hingarajiya
