Acknowledgments

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of few years of work whereby I have been accompanied and supported by many people. Having attained the climax of this doctoral research, I shall avail the highly privileged opportunity to thank all those who assisted me in completing this undertaking research successfully.

First and foremost, thanks is rendered to the predominant ruling power, the omnipotent force for showering his blessings, who has created me in this form and so, positioned me that I enhance the process of development in the world of Computer Science.

It gives me immense pleasure to express my sincere and wholehearted gratitude to my esteemed supervisor Professor S. Balasundaram for his invaluable guidance, encouragement and support without which, it would not have been possible for me to complete this undertaking successfully. He has been a great advisor with his management skills and enthusiasm. I appreciate his dedication to perfection and devotion to excellence. He also has been an exceptional role model with dexterous guidance, invaluable and untiring help, ever encouraging attitude and supervision throughout my research work. He has done his utmost to help relieve concerns that his advisees have. His incisive comments were a great help whenever I met unsolved problems. His broad understanding of computer science made it possible for me to develop my research abilities with more understanding. I owe my understanding of support vector machine to him and thank him for inculcating in me an appreciation for the quantitative aspects of pattern classification and regression problems. I appreciate his excitement and knowledge of the field as well as his perseverance when things became rough.

I also wish to thank Professor Parimala N., Dean, School of Computer & Systems Sciences, Jawaharlal Nehru University, New Delhi for providing the necessary research facilities.
I am thankful to Dr. S. K. Garg, Principal, Deen Dayal Upadhyaya College, University of Delhi for allowing me to carry out my research work along with my full teaching load.

I would like to thank Mrs. Rajni bala, my colleague for her kind help and inspiring advise to me time to time whenever and wherever required.

I offer my heartful appreciation to all my friends for their ever willing cooperation, moral support, and rendering ungrudging assistance whenever and wherever need arose and best wishes for successfully taking this study. I wish them very best in their life.

An endeavor like this cannot be accomplished without the full support of my family. I feel a deep sense of gratitude for my father and mother who formed part of my vision and taught me the good things that really matter in life. No words can express my sincere gratitude for my parents’ support and love. They are the light of my life and have given me the strength to reach for any goal I choose. I find no words to acknowledge in so formal manner the sacrifice, love, help and inspiration rendered by my wife Monika and daughter Vanshika to take up this study. I only hope they all are as proud of me as I am thankful for them.

I feel indebted to all those, who have never retraced back from helping me whenever the need arose.

Rampal Singh
New Delhi, June 2008.
