Acknowledgements

The completion of my thesis and subsequent Ph.D. has been a long journey. My thesis has always been a priority. At any rate, I have finished, but not alone, and am elated. I could not have succeeded without the invaluable support of a several. Without these supporters, especially the select few I am about to mention, I may not have gotten to where I am today, at least not sanely.

To this select group, I would like to express my deep and sincere gratitude to my supervisor Prof. Padmavati, Govt. V.Y.T.P.G. Autonomous College, Durg(C.G.), for her kind support and guidance have been of great value in this study. It has been an honor to be her first Ph.D. student.

I’d also like to give a heartfelt, special thanks to Dr. D.R. Sahu, Department of Mathematics, Banaras Hindu University, Varanasi, (U.P.). He is the first person who introduce me with the field of research. His wide Knowledge and his logical way of thinking have been of great value of me. His understanding, and personal guidance have provided a good basis for the present thesis. He’s been motivating, encouraging, and enlightening.

My gratitude is also extended to Dr. Sameer Dashputre, Department of mathematics, Shri Shankaracharya College of Engineering and Technology, Bhilai, C.G. He helps me in the preparation of synopsis. His support and personal cheering are greatly appreciated.

I am also thankful to Dr. Sunil Kumar Kashyap, Department of mathematics, Raipur Institute of Technology, Raipur, (C.G.) for his help and encouragement during my research work.

Last but not least, I wish to thank my family who have always supported me.

I am also thankful to all those who directly or indirectly help and support me during my research work.

Subhash Chandra Shrivastava
