ACKNOWLEDGEMENTS

“Before the throne of the Almighty, man will be judged not by his acts but by his intentions. For God alone reads our hearts.” - Mahatma Gandhi

I am grateful to the almighty who gave me the strength and will to persist, reach my goals and finally complete my doctorate.

I would like to express my gratitude towards my beloved Parents and Family for their kind co-operation, encouragement, understanding and endless love, through the duration of my study which helped me in the completion of the thesis.

I have taken efforts in this thesis. However, it would not have been possible without the kind support and help of many individuals and organizations. I would like to extend my sincere thanks to all of them.

I am highly indebted to Dr. G Arun Maiya for his guidance and constant supervision as well as for providing necessary information regarding the thesis and also for his support in completing the project.

I am also thankful to Dr. Barkur A Shastry for his constant guidance and patience with me during the thesis work.

Apart from the efforts that I have put in the thesis, the success of any project depends largely on the encouragement and guidelines of many others. I take this opportunity to express my gratitude to Mr. Senthil Kumaran D who has been instrumental in the successful
completion of my thesis. I would like to show my greatest appreciation to Dr. Shashikiran Umakanth for his tremendous support and help. Without his encouragement and support this project would not have materialized.

My thanks and appreciations also goes to my senior colleagues Mr. Girish N, Ranganathan G, Ravi R, Kalyan C, Manikandan N. I am grateful for their constant support and help.

When we honestly ask ourselves which person in our lives means the most to us, we often find that it is those who, instead of giving advices, solutions, or cures, have chosen rather to share our pain and touch our problems with warm and tender hands. I am thankful to Dr. Ajay, Dr. Ravindra, Dr. Kanishka, Dr. Siddhartha, Dr. Sonal, Dr. Vani, Dr. Dinesh and Dr. Sourjya for their constant support as my peers for the completion of my project. I am thankful to her help in editing the text for grammar and vocabulary.

This research project would not have been possible without the support of many people. My deepest gratitude is also due to the member of the doctoral committee, Dr. Rajashekar without their guidance this study would not had been successful.

Special thanks to Mr. Vasudev Guddattu for his statistical consultations which helped me to finish my work effectively and easily. I am also thankful to all my Undergraduate and Postgraduate friends, for their invaluable assistance.

I would also like to convey my sincere thanks to the Indian Council of Medical Research, government of India for financial support in form of Research fellowship for the project entitled “Photo stimulatory and Photo inhibitory Effect of Low Level Laser Therapy in Diabetic Wound Healing Dynamics – Preclinical Study”. I am extremely thankful to the
Department of Physiotherapy, Manipal University for providing an excellent laboratory facilities and necessary paraphernalia for the study.
