List of Figures

Figure 1
Chronology of the process of folliculogenesis in human ovary; (From Gougeon A. 1986 Dynamics of follicular growth in the human: a model from preliminary results. Hum Reprod 1,81-87)

Figure 2
Female reproductive system

Figure 3
Stages of initial recruitment of follicles in human

Figure 4
Phases of menstrual cycle

Figure 5
Electropherograms of c.769G>A variant of the INHA gene

Figure 6
RFLP profile of the INHa1 product with BbvI restriction enzyme digestion. Lane 1, the 50 bp marker; lane 2, undigested PCR product; lanes 3 and 4, wild-type; lanes 5 and 6, the heterozygous mutant; lane 7, the homozygous mutant (as described by Shelling et al. 2000)
Figure 7
Electropherograms of other variants in the coding region of the \textit{INHA} gene except c.769G>A

Figure 8
Electropherograms of the \textit{INHBA} and \textit{INHBB} gene variant

Figure 9
Graph showing distribution of age of amenorrhoea among POF patients without the c.769G>A mutation (Series 1) and patients with the mutation (Series 2)

Figure 10
Electropherograms of all the variants in the \textit{GDF9} gene

Figure 11
Electropherograms of the variants revealed in the \textit{BMP15} gene

Figure 12
Electropherograms of the variants revealed in the \textit{TGFBR3} gene

Figure 13
Electropherograms of the variants revealed in the \textit{ACVR1B} gene
Figure 14
The pathway representing candidate genes of ovarian failure involved in FSH regulation.

Figure 15
Detailed presentation of inhibin and activin receptor system on gonadotroph cells.

Figure 16
Graphical distribution of missense variants of all studied genes among POF cases

Figure 17
Graphical distribution of missense variants of all studied genes among PA cases
