Acknowledgments

It gives me immense pleasure to express my heart felt gratitude to all those who have been there all the while during my research period, lending their help in every possible way.

It is with all sincerity and high regards that I express my deep sense of gratitude to Dr. Jacob Chacko, Professor, Department of Chemical Oceanography, School of Marine Sciences, Cochin University of Science and Technology, for his meticulous guidance, pertinent encouragement, inspiring discussions and valuable suggestions throughout this investigation. I consider myself fortunate that during this formative period, I got a chance to associate with him who has given me the much needed boost. I will ever remain grateful to him for his wise counsel, unfailing attention and for suggesting me an interesting problem and guiding through its solutions. I owe him a great deal for instilling in me an uncompromising sense of perseverance in the quest for success. This thesis would not have seen the light of the day without his support and care.

It is my pleasant duty to express my gratefulness and sincere thanks to Dr. N. Chandramohanakumar, Head, Department of Chemical Oceanography, School of Marine Sciences, Cochin University of Science and Technology, for providing me the necessary facilities to carry out the research work apart from his inspiration throughout this investigation.

I profoundly thank Dr. S. Muraleedharan Nair and Dr. C.H. Sujatha, Lecturers, Department of Chemical Oceanography, School of Marine Sciences, Cochin University of Science and Technology, who have always been a constant source of friendly encouragement.

I am grateful to Dr. K. T. Damodaran, Director, School of Marine sciences, for providing all the necessary facilities.

I place on record my sincere gratitude to Mr. S. Krishnan, Assistant Professor, Department of Agriculture Statistics, College of Horticulture.
Kerala Agriculture University, for his immense help rendered in statistic, analysis and interpretation of the data.

I wish to express my thanks to Dr. K.J. Joseph, Professor, Department of Marine Biology, Microbiology and Biochemistry, Cochin University of Science and Technology, for his valuable and inspiring suggestions during the course of this work.

I owe my hearty thanks to Dr. Rini Sebastion, Dr. Shaly John Dr. P.V. Joseph, Dr. P. Unnikrishnan, Dr. Daniel Munga and Miss. Sarika P.R. for their valuable criticisms, patient listening and timely help during the entire course of this work. My special thanks are due to Dr. Anu Gopinath for carefully reading through the manuscript and for her touching remarks.

I am indebted to Mr. Kalesh N.S., Mr. Laluraj C.M., Ms. Geetha Andrews, Dr. Babu V and all other research scholars of the Department of Chemical Oceanography for their invaluable co-operation in the time of need. With much gratitude, I acknowledge the sincere co-operation and help rendered by the non-teaching staff of the Department of Chemical Oceanography. I earnestly thank Mr. Dinesan and Mr. Stephen for their enthusiasm and assistance during sampling/field trips.

I am failing in words to express my feelings to my beloved friends at hostel especially to my roommate Miss. Sincy Joseph, who were giving me encouragement and stood behind me in ups and downs and gave me inspiration and moral support for the completion of this task. The beautiful, happy moments shared with them had always been the most revitalizing ones in my life.

Last but by no means least, I am immensely indebted to my beloved parents and sisters who filled me with courage at times of despair and frustration and their love and affection always lighted my path.
