LIST OF TABLES

Table-1. Effects of mobile phone RF-EMR on increased emotionality-like behaviours

Table-2. Effects of mobile phone RF-EMR on general locomotor behaviours

Table-3. Effects of mobile phone RF-EMR on emotional learning and memory

Table-4. Effects of mobile phone RF-EMR on memory retention 24 hours after the shock

Table-5. Effects of mobile phone RF-EMR on memory retention 48 hours after the shock

Table-6. Effects of mobile phone RF-EMR on spatial learning and memory

Table-7. Effects of mobile phone RF-EMR on spatial memory probe trial

Table-8. Effects of mobile phone RF-EMR on spatial memory retention

Table-9. Effects of mobile phone RF-EMR on degree of neuronal survival

Table-10. Effects of mobile phone RF-EMR on DNA strand breaks

Table-11. Effects of mobile phone RF-EMR on hippocampal CA3 pyramidal neuron apical dendritic intersections

Table-12. Effects of mobile phone RF-EMR on hippocampal CA3 pyramidal neuron apical dendritic branching points

Table-13. Effects of mobile phone RF-EMR on hippocampal CA3 pyramidal neuron basal dendritic intersections

Table-14. Effects of mobile phone RF-EMR on hippocampal CA3 pyramidal neuron basal dendritic branching points

Table-15. Effects of mobile phone RF-EMR on basolateral amygdaloid pyramidal neuron dendritic intersections
Table-16. Effects of mobile phone RF-EMR on basolateral amygdaloid pyramidal neuron dendritic branching points

Table-17. Effects of mobile phone RF-EMR on biochemical indexes in hippocampus and amygdala

Table-18. Effects of mobile phone RF-EMR on biochemical indexes in prefrontal cortex and cerebellum

Table-19. Comparison of biochemical indexes in discrete brain regions of RF-EMR exposed group

Table-20. Effects of mobile phone RF-EMR on Caspase-3 activity in discrete brain regions
