ACKNOWLEDGEMENTS

First and foremost I would like to thank Dr. Y. Singh, Professor, Department of Physics, University of Kashmir, who guided me through this thesis despite his busy schedule. His help came ~~at~~ a time when I did not know what kind of research work was worth doing. I am in debt to him not only for much of what went into this thesis, but also for the stimulating discussions I had with him during the progress of this work, which were a constant source of encouragement and support. Working with him has truly been an inspiring learning experience for me. His trust and confidence in me is also acknowledged.

I wish to thank Prof. M. K. Khera, Head, Department of Physics, University of Kashmir for providing various facilities to me from time to time during the course of my research work.

It is also a pleasure to thank Dr. D. S. Parmar, Reader, Department of Physics, University of Kashmir for his friendliness and understanding. His readiness to extend his helping hand is acknowledged.

I owe my thanks to a number of physicists of the country and abroad, amongst whom Prof. J. M. Rowel of Bell Laboratories, U.S.A.; Prof. Albert Schmid of Universität Dortmund, Institut für Physik, Germany and Prof. J. E. Goij of Delft University of Technology, Delft, The Netherlands need special mention for their fruitful correspondence, which has in one way or the other influenced this work. I specially

thank Prof. J..M. Rowel for giving me permission to use some of his data.

244

I thank also Director, Reactor Research Centre, Kalpakkam who allowed me to work at the Centre. The work with G. Dharmadurai in R. R. C. has been very stimulating. I am indebted to him for his valuable comments and suggestions which helped me in my research work.

I should also thank the Director, Indian Institute of Science, Bangalore for allowing me to work as a short time research worker at the Institute. The discussions with Prof. K. P. Sinha there have been stimulating.

I am to thank my fellow researchers amongst whom Drs. H. L. Bhan; B. A. Mattoo, V. K. Bhat and A. R. Rafiqui need a special mention. I owe to them some very pleasant memories.

I thank also various other teachers and research scholars of the Department of Physics, who have helped me in one way or the other.

I am grateful to University Grants Commission for providing me the research scholarship which supported me over a period of four years. The Govt. of J&K also deserve thanks for granting me study leave.

I thank Shri K. L. Gadroo for typing this thesis painstakingly. I appreciate his skillful typing of many complicated expressions in this thesis. Finally, I acknowledge the constant support of my family members and numerous other friends.
