'ACKNOWLEDGEMENTS'

It gives me immense pleasure to express my sincere gratitude to Prof. D. P. Zutshi, who inspired me to undertake the present study. His valuable suggestions have been a great asset to me. Without his scholarly guidance, sympathetic and encouraging attitude, it would not have been possible for me to complete the study.

I express my deep appreciation to Prof. M. Y. Qadiri, Dean, Faculty of Science, University of Kashmir, who has been kind enough to provide the necessary facilities in the Centre of Research for Development during the period of my research work.

To my parents, I express my sincere gratitude for their encouragement, blessings and financial support
during my studies, especially my father, who has guided me in the application of analytical techniques for deriving sound conclusions.

I cannot ever forget the innumerable constructive co-operation extended to me by Miss Anjana Ticku.

The help extended by my colleagues is also acknowledged with thanks.

I gratefully express my deep sense of sincerity to Miss Alley Kelly, Research Scholar, Wisconsin University, USA for providing relevant literature.

I wish to thank the Department of Science and Technology, Government of Jammu and Kashmir for grant of Research fellowship.

Thanks are also due to the Chief Engineer, USSD
and other Officers of the Department, who were very kind to provide help in the field and kept one of the harvesters at our disposal.

The help extended by the field assistant Mr. Bashir Ahmad, is also acknowledged with thanks.

Last but not the least I would like to thank Shri K. L. Gadroo for typing out the manuscript.
