LIST OF FIGURES

Fig 2.1 India’s primary energy sources

Fig 2.2 Projected primary energy mix in India (up to 2025)

Fig 2.3 Comparison of fuel consumption in 1990 and 2005

Fig.2.4 Electricity generation capacity mix in India in 2005

Fig.2.5 Coal usage in India (Projections up to 2020)

Fig.2.6 Coal usage in India (1981 – 2004)

Fig.2.7 Sectors contribution to power generation in India.

Fig.2.8 Fuel share in power generation in India (2009, 2008)

Fig.3.1 Hierarchy of needs of human beings

Fig. 5.1 Battery operated vehicles sales in Lucknow city since 2008

Fig. 5.2 Diffusion of solar home lighting system in rural areas of Barabanki up to 2050.

Fig 6.1 Projected level dissemination of wind power potential in India using BM up to 2050.

Fig.6.2 Projected level dissemination of small hydro power potential in India using BM up to 2050.

Fig.6.3 Projected level dissemination of biomass power potential in India
using BM up to 2050

Fig. 6.4 Projected level dissemination of cogeneration based generation in using BM up to 2050

Fig. 6.5 Projected level dissemination of wind power potential in India using PM up to 2050.

Fig. 6.6 Projected level dissemination of small hydro power potential in India using Pearl model up to 2050

Fig. 6.7 Projected level dissemination of biomass power potential in India using Pearl model up to 2050

Fig. 6.8 Projected level dissemination of bagasse based cogeneration potential in India using Pearl model up to 2050

Fig. 6.9 Projected level dissemination of wind power potential in India using Logistic model up to 2050

Fig. 6.10 Projected level dissemination of SHP power potential in India using Logistic Model up to 2050

Fig. 6.11 Projected level dissemination of biomass power potential in India using Logistic model up to 2050.

Fig 6.12 Projected level dissemination of bagasse based cogeneration
potential in India using LM up to 2050

Fig. 6.13 Comparison of technology diffusion models for estimation of growth of wind potential in India

Fig. 6.14 Comparison of technology diffusion models for estimation of growth of small hydro potential in India

Fig. 6.15 Comparison of technology diffusion models for estimation of growth of biomass potential in India

Fig. 6.16 Comparison of technology diffusion models for estimation of growth of cogeneration (bagasse) potential in India

Fig. 6.17 Comparison of rate of rise of power generated from renewables during 2007-2009 using diffusion models
