</table>
3.1 Materials Management and Project Management .......... 48
3.2 Benefits and Costs of a Materials Management System ................................................................. 50
3.3 Role of Vendor/Supplier and Fabricator ................. 52
3.4 Models Developed and Studies of Effectiveness of Materials Management ........................................ 53
3.5 Use of Technology for Materials Management ........ 58
  3.5.1 Bar Codes Applications to Material Management .......................................................... 62
  3.5.2 Radio Frequency Identification (RFID) Applications to Materials Management .............. 64
  3.5.3 Handheld Devices for Material Management ....... 65
3.6 Cultural Change in Small Scale in Industry ............... 66
3.7 Over View of Supply Chain Management .................. 67
  3.7.1 Small Medium Enterprises Characteristics and Challenges ............................................. 71
  3.7.2 Relationship between Small Medium Enterprises and Supply Chain Management ........ 72
3.8 Supply Chain Management for Manufacturing Industry ................................................................. 74
3.9 Knowledge Management ........................................ 75

4. AN OVERVIEW OF THE SMALL SCALE ELECTRICAL CONTRACTING INDUSTRY AND CURRENT MATERIAL MANAGEMENT PRACTICES ........................................................................ 77-131
4.1 Electrical Contractors Industry-Background .............. 77
4.2 Services Provided by Electrical Manufacturing and Contracting Industries ........................................................ 81
4.3 Materials Purchasing by Electrical Industries .................. 82
4.4 Typical Products Used By Electrical Contractors ............ 84
4.5 Current Material Management Practices in the Electrical Manufacturing and Contracting Industry ....... 89
  4.5.1 Phase 1 : Bidding .................................................... 90
  4.5.2 Phase 2: Sourcing ................................................... 92
  4.5.3 Phase 3: Material Procurement ................................. 94
  4.5.4 Phase 4: Construction ............................................. 97
    4.5.4.1 Material Requisition Process .................... 100
  4.5.5 Phase 5 : Post Construction .................................... 110
4.6 Supplier/ Industry Arrangements ........................................ 121
  4.6.1 Partnering ................................................................ 122
    4.6.1.1 Benefits of Partnering .............................. 125
    4.6.1.2 Concerns with Partnering ......................... 126
  4.6.2 Value Added Services ............................................. 126

5. MATERIALS MANAGEMENT CHALLENGES IN CURRENT PRACTICES ......................................................... 132-144
  5.1 Challenges—Information Technology .............................. 133
  5.2 Challenges—Decision Modeling ...................................... 136
  5.3 Challenges—Implementation Management .................... 143

6. DECISION MODELING APPROACH ........................................ 145-151
  6.1 Modeling Approach Used ............................................. 147
  6.2 Decision Making Process Studied .................................... 150
7. FRAMEWORK FOR A DECISION SUPPORT SYSTEM FOR SUPPLY CHAIN MANAGEMENT .......... 152-170

7.1 Description of Framework for Decision Model and Description of the Decision Making Process for supply Chain Management ................................................ 153

7.1.1 “What Material to Buy” Decision Node .................. 153

7.1.2 “How Much to Buy” Decision Node ..................... 157

7.1.3 “When to buy Material” Decision Node ............... 159

7.1.4 “When to Deliver Material” Decision Node ......... 163

7.1.5 “Where to Deliver Material” Decision Node ........ 166

7.1.6 “Where to Store on Site” Decision Node .......... 168

7.2 Summary ........................................................................ 170

8. DEVELOPMENT OF SPARCS- SUPPLY CHAIN PARAMETERS CLASSIFICATION SYSTEM FOR SMALL SCALE INDUSTRY ................................................... 171-201

8.1 SPARCS ........................................................................... 172

8.2 Development of SPARCS .............................................. 176

8.2.1 Data Definition of SPARCS .................................. 177

8.3 SPARCS for the ‘How Much to Buy’ Decision ............ 186

8.4 SPARCS for the ‘What Material to Buy’ Decision ........ 188

8.5 SPARCS for the ‘Where to Deliver’ Decision .......... 191

8.6 SPARCS for the ‘Where to Store on Site’ Decision ...... 194

8.7 SPARCS for the ‘When to Deliver’ Decision ............ 196

8.8 SPARCS for the ‘When to Buy’ Decision ...................... 199

8.9 Summary ........................................................................ 201
9. SUMMARY CONCLUSIONS AND RECOMMENDATIONS .......................................................... 202-209

9.1 Summary .................................................................................. 202
9.2 Conclusions .............................................................................. 204
9.3 Contributions .......................................................................... 205
9.4 Directions for Future Research ............................................... 206
9.5 Recommendations .................................................................... 208

Appendix I: Questionnaires ........................................................ 210-220
Appendix II: Flowcharts and Narratives .................................... 221-249
List of Publications ....................................................................... 250-251
References .................................................................................. 252-266
Vita ............................................................................................. 267
