ACKNOWLEDGEMENTS

Words are inadequate to express my profound sense of gratitude and indebtedness to my revered teacher and research supervisor, Dr. Anand Prakash Mishra, M. Sc., D. Phil. (Allahabad), Reader in Inorganic Chemistry, Department of Chemistry, Dr. H. S. Gour University, Sagar (M. P.), whose able guidance enabled me to bring out the present thesis.

I am indebted to prof. S. P. Banerjee, Head, Department of Chemistry, Dr. H. S. Gour University, Sagar, for generous help in providing departmental facilities to carry out the present work. I am also thankful to Prof. D. K. Saxena for encouragement during this work.

I am thankful to the RSIC, CDRI, Lucknow, I I T Mumbai and BARC Mumbai for spectral and analytical studies of the synthesized compounds. Thanks are also due to Head, Botany Department of Sagar University for providing the facilities to carry out the various biological activities. I would like to place my sincere thank to the Director, TAACF, BIRMINGHAM, (U. K.) for antitubercular screening mentioned in this thesis.

I am very much thankful to University Grants Commission, New Delhi, for providing financial assistance in the form of Project Fellow in Major Research Project.

I would like to offer my profound respect and sincere gratitude to Dr. D. K. Dwivedi, Reader, Atarra P. G. College for encouraging attitude during this work.

I offer my profound respect and feelings to my loving parents and all the family members without whose patience, sacrifice, blessings and cooperation, I would not have been in a position to complete my research programme.

I wish to express my thanks to my seniors and colleagues, Dr. Mahima Khare, Mrs. Ritu Yadav, Dr. Leena Jais, Ms. Niharika Guru, Mr. B. K. Chouksey, Mr. Manish Shukla, Mr. Krishna Kumar and Ms. Hershita, for cooperation and continued help at every stage. I am also grateful to Sai Computer Center for printing.
