ACKNOWLEDGEMENT

First of all I would like to express my deepest gratitude and sincere thanks to my guide and supervisor, Dr. P Ravinder Reddy, Professor and Head of the department, Mechanical Engineering, CBIT, for his valuable time and keen interest in my research work. His intellectual advice has helped me in every step of my research work.

I owe enormous debt of gratitude to co-supervisor Dr. ACS Kumar, Former Professor and Vice Principal, JNTUH college of Engineering, Hyderabad, for his valuable suggestions and constant encouragement throughout my research work.

I would like to thanks to Mr. Yatin Tambe, Director of Friction Welding Technologies, for extending his research facilities to carry out my research work. His mentorship was paramount in providing a well rounded experience which helped me to focus on practical challenges related to friction welding for critical applications.

I wish to record my deep sense of gratitude to Mr. Paul Nokes, Aerospace Head and Mr. Steve, Chief Engineer, Tata Technologies, United Kingdom for sharing their practical experience.
I would like to thanks management of Pune University, MIT College, Elca laboratories, Chataniya Laboratories for extending their laboratory facilities to carry out my research work.

I sincerely thank Mr. T. Rajasekaran, Vice President and Mr. G.S Singh, Practice Head, Mr. R. Kumar, Associate vice president, Tata Technologies for their constant encouragement.

I would like to gratitude my mother Mrs. Ghousia Begum and my father Mr. Khairul Mubeen Khan, without their vision, aspiration, constant encouragement and support, it would have been impossible for me to complete this work.

I would like to thanks my brothers and sister for their continuous encouragement throughout my research work.

A good share of credit for successful completion of this thesis lies on the part of my wife Mrs. Saba for her secretarial involvement throughout my research work.

Finally I would like to thank one and all for their direct or indirect help in successful completion of my research work.

Ishtiaq Ahmed Khan
