CHAPTER-8

LIMITATION OF STUDY

The study has the following limitations

- Time limit of the researcher is one major limitation
- The survey is subjected to the bias and prejudices of the respondents. Hence 100% accuracy can’t be assured.
- The research is confined to limited city only, so the result might be indicative not conclusive
- Findings of the research are based on what the respondent have stated as true
- As the study is planning to conduct on teachers of particular city, so the same result may not hold true for other areas.
- Present study was conducted on female sex, so, finding is not conclusive to male sex statistically.
