LIST OF PLATES

S. No.

PLATE 1
  Fig 1. Satellite Image taken with the help of GPS Navigator Calorado Series 300 of Lentil Field Site Selected for Observation at Agra
  Fig 2. GPS Navigator Calorado Series 300 instrument made by Gramin International, Inc. 1200 East 151st Street, Olathe, Kansas 660062, USA

PLATE 2
  Fig 1. Soil Profile of Selected Lentil Crop Fields at Agra

PLATE 3
  Fig 1. Nematode Galls Present on Roots of Lentil Plant

PLATE 4
  Fig 1. Colonies of R. leguminosarum
  Fig 2. Colonies of P. polymyxa
  Fig 3. Colonies of A. chroococcum
  Fig 4. Colonies of A. lipoferum

PLATE 5
  Fig 1. Broth Culture of R. leguminosarum
  Fig 2. Broth Culture of P. Polymyxa
  Fig 3. Broth Culture of A. chroococcum

PLATE 6
  Fig 1. Lentil Seeds on Soft Agar
  Fig 2. Germination of Lentil Seeds on Soft Agar
  Fig 3. Insertion of germinated Lentil seeds in the Slants

PLATE 7
  Fig 1. Shoot Growth in Lentil Plants
  Fig 2. Root Growth in Lentil Plants

PLATE 8
  Fig 1. Bacterized and nonbacterized Lentil Seeds
  Fig 2. Plant growth from bacterized and non bacterized seeds
PLATE 9
Fig 1. Root System of Lentil Plants
Fig 2. Nodulation in Roots of Lentil Plant

PLATE 10
Fig 1. Flower at A stage; small bud petals not visible yet
Fig 2. Flower at B stage; petals are visible but not expanded

PLATE 11
Fig 1. Flower at C Stage; flower open
Fig 2. Flower at D Stage; full bloom and anthesis

PLATE 12
Fig 1. Acetocarmine stained cells of pollen grains and also germinating pollen observed under microscope indicating pollen fertility of Lentil
Fig 2. Germinating Pollen grain of Lentil

PLATE 13
Fig. 1. Mature Pods of Lentil
Fig. 2. Pod damage caused by insect pest

PLATE 14
Fig 1. Seeds of Lentil
Fig 2. Pod and seed drop of Lentil in fields at the time of harvesting

PLATE 15 Estimation of Correlation between
Fig 1. Flowers/Plant and Plant Height
Fig 2. Pods/Plant and Plant Height
Fig 3. Pods/Plant and Flowers/Plant
Fig 4. Seeds/Pod and Plant Height

PLATE 16 Estimation of Correlation between
Fig 1. Seeds/Pod and Flowers/Plant
Fig 2. Seeds/Pod and Pods/Plant
Fig 3. 100-seed weight and Plant Height
Fig 4. 100-Seed Weight and Flowers/Plant

PLATE 17 Estimation of Correlation between
Fig 1. 100-Seed Weight and Pods/Plant
Fig 2. 100-Seed Weight and Seeds/Pod
Fig 3. Biological Yield and Plant Height
Fig 4. Biological Yield and Flowers/Plant

PLATE 18 Estimation of Correlation between
Fig 1. Biological Yield and Pods/Plant
Fig 2. Biological Yield and Seeds/Pod
Fig 3. Biological Yield and 100-Seed Weight
Fig 4. Seed Yield and Plant Height

PLATE 19 Estimation of Correlation between
Fig 1. Seed Yield and Flowers/Plant
Fig 2. Seed Yield and Pods/Plant
Fig 3. Seed Yield and Seeds/Pod
Fig 4. Seeds Yield and 100-Seed Weight

PLATE 20 Estimation of Correlation between
Fig 1. Seed Yield and Biological Yield
Fig 2. Harvest Index and Plant Height
Fig 3. Harvest Index and Flowers/Plant
Fig 4. Harvest Index and Pods/Plant

PLATE 21 Estimation of Correlation between
Fig 1. Harvest Index and Seeds/Pod
Fig 2. Harvest Index and 100-Seed Weight
Fig 3. Harvest Index and Biological Yield
Fig 4. Harvest Index and Seed Yield

PLATE 22
Fig 1. Growth of Lentil Plants in Control Plot at 85 DAS

PLATE 23
Fig 2. Growth of Lentil Plants in Treated Plot (FYM+Chemical+Biofertilizer) at DAS

PLATE 24
Fig 1. Chenopodium album
Fig 2. Fumaria officianalis
PLATE 25
  Fig 1. *Asphodelus teunifolius*
  Fig 2. *Chenopodium murale*

PLATE 26
  Fig 1. *Spergula arvensis*
  Fig 2. *Avena sativa*

PLATE 27
  Fig 1. *Amaranthus virdis*
  Fig 2. *Angalis arvensis*

PLATE 28
  Fig 1. Study of weed population density in Lentil crop field

PLATE 29
  Fig 1. Growth of Lentil Plants in control (weedy) plot at 75 DAS

PLATE 30
  Fig 1. Growth of Lentil Plants in hand weeded plot at 75 DAS

PLATE 31
  Fig 1. Root growth in *Allium cepa* in Control
  Fig 2. Inhibition of Root Growth in *Allium cepa* in higher Concentration of Pendimethalin

PLATE 32
  Fig 1. Root Growth in *Allium cepa* in lower concentration of Pendimethalin
  Fig 2. Root Growth in *Allium cepa* after Recovery

PLATE 33
  Fig 1. Root length in *Allium cepa* in higher concentration of pendimethalin
  Fig 2. Root length in *Allium cepa* in lower concentration of pendimethalin
  Fig 3. Mitotic index in *Allium cepa* in higher concentration of pendimethalin
  Fig 4. Mitotic index in *Allium cepa* in lower concentration of pendimethalin

PLATE 34 Micro photographs of some selected cytological stages of *Allium cepa*
  Fig 1. Interphase, Prophase, and Anaphase stages
  Fig 2. Interphase, Prophase, Metaphase and Anaphase
  Fig 3. Prophase, Metaphase and Anaphase
  Fig 4. Prophase and Early Anaphase
PLATE 35 Micro photographs of some selected cytological stages of *Allium cepa*

Fig 1. Cells showing some laggard Chromosomes
Fig 2. Early Telophase showing Micronucleus
Fig 3. Cells showing Metaphase and Anaphase with a laggard chromosomes
Fig 4. Chromosome clumping in a cell

PLATE 36 Micro photographs of some selected cytological stages of *Allium cepa*

Fig 1. Chromosomal bridge
Fig 2. Anaphase showing chromosomal fragment
Fig 3. Vagrant Chromosome in Anaphase
Fig 4. Metaphase abnormalities

PLATE 37

Fig 1. Annual Maximum Temperature (five yearly moving averages) at Agra
(1901-1970)
Fig 2. Annual Maximum Temperature (five yearly moving averages) at Agra
(1971-2012)

PLATE 38

Fig 1. Rabi Season Maximum Temperature (five yearly moving averages) at Agra
(1901-1970)
Fig 2. Rabi Season Maximum Temperature (five yearly moving averages) at Agra
(1971-2012)

PLATE 39

Fig 1. Annual Minimum Temperature (five yearly moving averages) at Agra
(1901-1970)
Fig 2. Annual Minimum Temperature (five yearly moving averages) at Agra
(1971-2012)

PLATE 40

Fig 1. Rabi Season Minimum Temperature (five yearly moving averages) at Agra
(1901-1970)
Fig 2. Rabi Season Minimum Temperature (five yearly moving averages) at Agra
(1971-2012)
PLATE 41
Fig 1. Average Maximum Temperature in Rabi season past century (1901-2000) and the latest 12 year period (2001-2012) and also the average deviation of maximum temperature in the latest period
Fig 2. Average Minimum Temperature in Rabi season past century (1901-2000) and the latest 12 year period (2001-2012) and also the average deviation of minimum temperature in the latest period

PLATE 42
Fig 1. Annual Rainfall (five yearly moving averages) at Agra (1901-1970)
Fig 2. Annual Rainfall (five yearly moving averages) at Agra (1971-2012)

PLATE 43
Fig 1. Rabi Season Rainfall (five yearly moving averages) at Agra (1971-2012)
Fig 2. Rabi Season Rainfall (five yearly moving averages) at Agra (1971-2012)

PLATE 44
Fig 1. Average Rainfall in Rabi season past century (1901-2000) and the latest 12 year period (2001-2012) and also the average deviation of rainfall in the latest period

PLATE 45
Fig 1. Causal loop diagram of weed management model of Lentil crop
