List of Tables

Table 2.1: SSIM comparison of 2DLMF method with different \( q \) after Salt and Pepper Noise

Table 2.2: SSIM comparison of 2DLMF method with different \( q \) after Salt and Pepper Noise

Table 2.3: SSIM comparison of 2DRMF method with different \( q \) after Salt and Pepper Noise

Table 2.4: SSIM comparison of 2DRMF method with different \( q \) after Salt and Pepper Noise

Table 2.5: SSIM comparison of proposed methods with existing filtering techniques after Salt and Pepper Noise (3 × 3)

Table 2.6: SSIM comparison of proposed methods with existing filtering techniques after Salt and Pepper Noise (5 × 5)

Table 2.7: SSIM comparison of proposed methods with existing filtering techniques after Salt and Pepper Noise (7 × 7)

Table 2.8: SSIM comparison of proposed methods with existing filtering techniques after Salt and Pepper Noise (9 × 9)

Table 2.9: SSIM comparison of proposed methods with existing filtering techniques after Salt and Pepper Noise (11 × 11)

Table 2.10: SSIM comparison of proposed methods with existing filtering techniques after Salt and Pepper Noise (13 × 13)

Table 2.11: SSIM comparison of proposed methods with existing filtering techniques after Salt and Pepper Noise (15 × 15)
Table 2.12: SSIM comparison of proposed methods with existing filtering techniques after Salt and Pepper Noise (17 × 17) ........................................... 67

Table 2.13: SSIM comparison of proposed methods with existing filtering techniques after Gaussian Noise................................................................. 69

Table 2.14: SSIM comparison of proposed methods with existing filtering techniques by Gaussian + Salt and Pepper Noises (3×3) .............................. 77

Table 2.15: SSIM comparison of proposed methods with existing filtering techniques by Gaussian + Salt and Pepper Noises (5×5) .............................. 78

Table 2.16: SSIM comparison of proposed methods with existing filtering techniques by Gaussian + Salt and Pepper Noises (7×7) .............................. 78

Table 2.17: SSIM comparison of proposed methods with existing filtering techniques by Gaussian + Salt and Pepper Noises (9×9) .............................. 79

Table 2.18: SSIM comparison of proposed methods with existing filtering techniques by Gaussian + Salt and Pepper Noises (11×11) .............................. 79

Table 2.19: SSIM comparison of proposed methods with existing filtering techniques by Gaussian + Salt and Pepper Noises (13×13) .............................. 80

Table 2.20: SSIM comparison of proposed methods with existing filtering techniques by Gaussian + Salt and Pepper Noises (15×15) .............................. 80

Table 2.21: SSIM comparison of proposed methods with existing filtering techniques by Gaussian + Salt and Pepper Noises (17×17) .............................. 81

Table 4.1: The results of 413 Round defects classification by SVM....................... 117

Table 4.2: The results of 413 Round defects classification by KNN....................... 117

Table 4.3: The results of defects classification proposed technique......................... 118
Table 4.4: The results LOP defect classification by SVM................................. 120
Table 4.5: The results LOP defect classification by KNN...................................... 120
Table 4.6: The results UC defect classification by SVM........................................ 122
Table 4.7: The results UC defect classification by KNN........................................ 122
Table 4.8: The results IF defect classification by SNM.......................................... 124
Table 4.9: The results IF defect classification by KNN.......................................... 124
