ACKNOWLEDGEMENTS

Writing this thesis has been fascinating and extremely rewarding. I would like to thank a number of people who have contributed to the final result in many different ways:

To commence with, I pay my obeisance to GOD, the almighty to have bestowed upon me good health, courage, inspiration, zeal and the light. After GOD, I express my sincere and deepest gratitude to my supervisor, Prof. (Dr.) Harbhajan Kaur who ploughed through several preliminary versions of my text, making critical suggestions and posing challenging questions. Her expertise, invaluable guidance, constant encouragement, affectionate attitude, understanding, patience and healthy criticism added considerably to my graduate experience.
