ACKNOWLEDGEMENTS

A journey is easier when you travel together. Interdependence is more valuable than independence. I have not traveled in a vacuum in this journey. There are some people who made this journey easier with words of encouragement and more intellectually satisfying. Upon the successful completion of this work, I would like to take this opportunity to share with you the beholdsed concern of few people, who are definitely special as their presence has facilitated my PhD towards completion. To me, my PhD has been a metamorphosis in terms of both professional and personal abilities and these people who were attached to me have favored it at one or more crucial step. I compulsively feel in the first instance to express my sincere gratitude to all those who have given me their time, assistance and patience so generously and have made my research period in IGIB an ever treasured experience.

First and foremost, it is an immense pleasure and my arrogant privilege to have worked under the guidance of Dr. M. A. Qadar Pasha, Scientist, IGIB. I express my deep sense of gratitude to him for his guidance, encouragement, and freedom. His trust and scientific excitement has inspired me and I am glad to have worked with him. He has supported me both personally and professionally. His wisdom, discipline, insightful conversations, sincerity and dedication has greatly influenced me and developed my scientific horizons. I am indebted to him for the characters he has implanted in me. Dear Sir, I would like to share with you my best scientific achievements in future and joyfull feeling of those, because I grew up in science only due to your supervision and concerns. When I joined the Lab., I had very little knowledge of scientific research as a field. Your subtle ways of encouragement helped me, as a beginner, in my journey into the depth of my research work. Dear Sir, I would like to say a big ‘Thanks a lot”, and any expression of gratitude would be only a faint reflection of what I feel.

I also feel lucky to have Dr. Saleem Javed, Jamia Hamdard, as my co-supervisor. I could not have imagined having a better co-supervisor for my PhD, and without his common-sense, knowledge, perceptiveness I would never have finished. His humbleness, caring attitude and intellect have motivated me a lot and it would be matter of great pride for me to have his advice and interactions in my future endeavors.

I would like to make a special mention of Dr. Santosh Pasha, Scientist, IGIB, for all the care and scientific input she has provided. Ma’m, I am thankful to you for the concerns you have shown in few seemingly impossible experiments. I enjoyed every moment of those challenges. You have been someone from whom I could always count on to give me a sage advice. Your caring attitude and homely concern at times of festivities have been so enjoyable for me.
My thanks are due for Prof. SK Brhamachari, Director, IGIB, for kindly providing me the necessary environment for research and scientific interaction, full use of the diverse laboratory facilities to carry out this work. His ability to analyze things in altogether different perspectives and to build interest in minds has made me learn much from him.

I would like to mention special regards and gratitude to Dr. MA Baig, with great humility, caring attitude and excellent personality. Beside his valuable assistance and interactions, he has motivated me a lot and it would be matter of great pride for me to remember him as great scientific and decent teacher.

I would like to thank Dr. AK. Goel, Hindurao hospital and Dr. Mohit Gupta, GB Pant hospital, Delhi, for their immense help with the collection of precious samples for this study. I would not have been able to carry out the work in this thesis without their help. I also want to acknowledge the hospital staff for providing me kind cooperation during sample collection.

My sincere thanks are to Dr. G. L. Sharma for his sensible help, love, care and concern. His valuable suggestions and time to time support and encouragement are greatly acknowledged.

I would like to take this opportunity to express gratitude to all the scientists at IGIB for their regular support, kindness and great hospitality. I wish particularly to acknowledge the other faculties at IGIB, namely, Dr. K. C. Gupta (Acting Director), Dr. Mitali Mukerji, Dr. Beena Pillai, Dr. Souvik Maiti, Dr.Rakesh Sharma, Dr.Rekha Chaturvedi, Dr. Balaram Ghosh, Dr. Taruna Madan, Dr. R. H. Das, Dr. Shantanu Sengupta, Dr. Munia Ganguli, Dr. Abhay Sharma for their help, suggestions and stimulating discussions.

A special note of thanks is due for Mr. R. B. Ram jee, for his timely help, technical support, encouragement and personal attention.

I wish to express my heart felt thanks to my Lab mates. Although they might not realise it, I feel proud to be associated with those from beginning of this journey. They created a lovely and positive atmosphere for me to work which I never felt being alone as a foreigner. The ambient that it is tough to me to leave it, and certainly declaring that wherever I will be, I will never forget them. Dear Lab mates, frankly speaking, I miss you all. Thanks to you for the friendship, hospitality, cooperation, support, sympathy while sadness or happiness. Tsering, you deserve a special vote of thanks for always standing beside me and cheering me up during tense times. No words would be sufficient to acknowledge your unstinted enthusiasm, cooperation
and support, especially at times of agony. Ehtesham, thank you so much for being an excellent colleague cum friend, and for sharing with me your social ideas. I wish to thank Jayashree for her wonderful comments and timely support. She has achieved a great skill of scientific writing. Arpana, she helped me with ample enthusiasm and spontaneous cooperation. She is calm and constant hard working. Thank you Manoj for being so keen and serious in escaping computer hassles and for great company and timely help. Rahul, I will not forget your enormous help and support. He is one that I predict bright horizons in his future career. I am lucky to have been in the company of senior colleagues like, Amjad, Charu, Karamjit and Aarif. Thanks a lot for being so helpful and providing spur-of-the-moment support. Promise to be there for all of them whenever they are in need.

Sudheer, thanks a lot for insightful conversations and being so helpful, honest and cooperative. I wish to thank Manish for being wonderful company and well-timed support. I should not forget to acknowledge the other colleagues in IGIB, viz., Mahesh, Kshitij, Krishua, Kashif, Gopal, Ishwar, Lakshna, Joytsna, Prashant, Pankaj, Ram kumar, Raj, Abid, Saif, Shanker, Mudit, Sandeep, Poonam, Santosh who have supported and cooperated at one or the other occasions. I am also grateful to numerous local and global “peers” who have contributed towards shaping this thesis.

I would like to convey my sincere thanks to Dr. Shakir Ali, Head, Department of Biochemistry, Jamia Hamdard, Delhi. My acknowledgements are due to Department of Biochemistry, Jamia Humdard, Humdard University, Delhi. Last but not the least I would like to acknowledge to all the staff members, Department of Biochemistry, Jamia Humdard, Humdard University, Delhi.

I mainly want to emphasize the support of my wife. I am very grateful to her for her constant support, love and patience during the PhD period.

This research has been supported and funded by Hormozgan University of health and Medical sciences as well as Ministry of health, treatment and medical sciences.
