ACKNOWLEDGEMENT

It would not have been possible to write this doctoral thesis without the help and support of the kind people around me, to only some of whom it is possible to give particular mention here.

Foremost, I would like to express my sincere gratitude to my guide Dr. Kalpesh Parikh for the continuous support of my Ph.D. study and research, for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better guide, supervisor and mentor for my Ph.D study.

This thesis would not have been possible without advice and help of Dr. Mehul Raval as he evaluated my progress as a member of RDC at KSV, Gandhinagar and gave me guidance in right direction.

I would like to acknowledge the management of CHARUSAT for giving me this opportunity and all kind of support in my better career. My special thanks to Dr. Atul Patel, Dean, Faculty of computer science and applications, CHARUSAT, changa for his valuable support and advice in fulfilling this thesis. My thanks to all my colleagues of CMPICA, Changa for unconditional support for this task especially Mr. Chirag Patel, Nirali Honest, Pranav Vyas and Maitri Chokshi.

This thesis would not have been possible without management of KSV, Gandhinagar as they registered me as a Ph.D. student and give me this opportunity to work for my thesis title.

Last but not the least; I would like to thank my family: my parents Dahiben and Trikamlal for supporting me economically and spiritually throughout my life. My hearty thanks to my wife Roshani who supports me in any kind of situation. My thanks to lovely Ritu for always making me smile and for understanding on those weekends when I was doing my Ph.D. work instead of playing games with her.
