At the outset, I wish to pay my most humble obeisance to the almighty God for giving me the inspiration and wisdom to take up this task. His guiding hand has brought this task to a successful completion. Any accomplishment requires the effort of many people and this work is no different. I do not wish to exclude anyone who has contributed to this work. It is however, not possible to mention everyone by name, as I certainly would forget some of them. Those who are not mentioned, but have shared parts of my work should know that I thank all of them for everything they have done for this dream. I wish to express my gratitude to those who may have contributed to this work even though anonymously. Yet I am trying to express my anonymous thanks to them.

First and foremost I want to thank my guide Prof. P. Bahadur. It has been an honor to be his Ph.D. student. He has taught me, both consciously and unconsciously, how good experimental chemistry is done. I appreciate all his contributions of time, ideas, and funding to make my Ph.D. experience productive and stimulating. The joy and enthusiasm he has for his research was contagious and motivational for me, even during tough times in the Ph.D. pursuit. His truly scientist intuition has made him, as a constant flow of ideas and passions in science, which exceptionally inspire and enrich my growth as a student and a researcher. I acknowledge deep appreciation for his critical suggestions in analyzing the results and in the improvement of my thesis without which it would not have appeared in the present form.

I would like to acknowledge my postgraduate mentor Prof. K. K. Desai for his teaching that has triggered and nourished my intellectual maturity that I will benefit from, for a long time to come. I offer my sincere thanks to authorities of Chemistry department for providing the necessary laboratory facilities and assistance for successfully completing my research work.
I gratefully acknowledge my labmates Dr. Paresh Parekh, Dr. Suresh Chavda, Nilesh Dhariaiya, Vijay Patel, Mehul Khimani and Ami Raval for providing a stimulating and fun environment in which to learn and grow. I wish to express my special note of thanks to seniors Drs. Dharmesh Varade, Jitendra Mata, Kalpesh Sidhapuria, Keyur Patel, Tejas Patel, Bhavesh Bharatiya, Ketan Kuperkar and Yogesh Kadam for their advice and willingness to share their bright thoughts with me, which were very fruitful for shaping up my ideas and research. I also express my thanks to Dr. Anita Bahadur and her students Dr. Neelam Mishra and Dr. Jagruti Barot.

I wish to thank my friends at department of chemistry, Veer Narmad South Gujarat University, Surat particularly Ritesh, Sarvil, Yogesh, Faiyaz, Imran, Shreyas, Yaxesh, Sunil, Himanshu, Asif, Alok, Chirag, Navneet, Amit, Nimesh, Pramod, Piyush, Nomesh, Sachin, Dipali, Hiral whose present somehow make my tenure perpetually refreshed, enjoyable and memorable.

I gratefully acknowledge the funding sources that made my Ph.D. work possible. I was funded by the GUJCOST, Gujarat, India.

I convey special acknowledgement to Dr. V. K. Aswal, Dr. G. Verma, Dr. P. A. Hassan and Dr. R. Ganguly BARC, Mumbai, India for allowing to use SANS and DLS facility. I am thankful to Prof G. Marangoni, Dr. Kulbir Singh and M.G. Perry StFX University, Canada for his experimental help in NMR studies.

Lastly, I would like to thank my family for all their love and encouragement. None of this would have been possible without their love, patience and prayer. My special appreciation goes to my parents Mr. Vikramsinh Parmar and Mrs. Jashodaben Solanki who sincerely raised me with their caring and gently loves and for their indefatigable belief in me despite their incomprehension about what I do. They put the fundamentals of my learning character, showing me the joy of intellectual chase ever since I was a child, believed in my ability and supported me in my study. I cannot thank enough to my brother Raviraj and sisters Dipti, Vaishali and their husband Mr. Ajitsinh and Mr. Manojsinh who always support and
encourage me during Ph.D. In reality, my family cherishes my success. Without them, all the achievements become meaningless. Thank you very much for everything you have done to me.

I am grateful to my friends Seema and Rajiv for their faithful support during the final stages of Ph.D. which is so appreciated.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

I finish with a final silence of gratitude for my life.

MARCH-2012

(Arpan Parmar)
