LIST OF TABLES

Table 2.1  Frequency Distribution of Performance Evaluation Scores  35
Table 2.2  Descriptive Statistics-Overall  35
Table 2.3  Descriptive Statistics- Sector-wise  36
Table 2.4  Tests of Normality  37
Table 2.5  Test Statistics  37
Table 2.6  References of DEA on the theme of ‘Selection’  49
Table 2.7  References of DEA on the theme of ‘Ownership’  52
Table 2.8  References of DEA on the theme of ‘Target Setting’  55
Table 2.9  References of DEA on the theme of ‘Managerial Implications’  58
Table 2.10 References of DEA on the theme of ‘Optimization’  60
Table 2.11 References of DEA on the theme of ‘Allocation’  62
Table 2.12 References of DEA on the theme of ‘Ranking’  65
Table 2.13 References of DEA on the theme of ‘Efficiency’  68
Table 2.14 References of DEA on the theme of ‘Benchmarking’  71
Table 2.15 References of DEA on the theme of ‘Performance evaluation’  74
Table 2.16 Distribution of papers on DEA according to theme and application area  75
Table 2.17 List of country-wise arranged review papers on DEA  78
Table 2.18 Classification according to various DEA Models  79
Table 2.19 References of TOPSIS on the topic of ‘Selection’  86
Table 2.20 References of TOPSIS on the topic of ‘Evaluation’  88
Table 2.21 References of TOPSIS on the topic of ‘Ranking’  91
Table 2.22 References of TOPSIS on the topic of ‘Optimization’  93
Table 2.23 References of TOPSIS on the topic of ‘Decision Making’  96
Table 2.24 References of TOPSIS on the topic of ‘Allocation’  98
Table 2.25 Distribution of papers on TOPSIS according to themes and application areas  99
Table 2.26 List of country-wise arranged review papers on TOPSIS  102
Table 2.27 References of SFA on the theme of ‘Agriculture’  108
Table 2.28 References of SFA on the theme of ‘Financial Institutions’  111
Table 2.29  References of SFA on the theme of ‘Energy’  113
Table 2.30  Distribution of papers on SFA according to themes and application areas  114
Table 2.31  List of country-wise arranged review papers on SFA  116
Table 4.1  Hypothetical data set with 2 outputs and 2 inputs  148
Table 4.2  ERM-DT, CRS-DEA and SDEA ranks for 2 output and 2 input data  149
Table 4.3  Spearman’s Rank test results for 2 outputs and 2 inputs data (for all three models)  150
Table 4.4  MSD results for 2 output and 2 input data (for all three models)  151
Table 4.5  ERM-DT, CRS-DEA and SDEA ranks for 3 output and 3 input data  152
Table 4.6  Spearman’s Rank test results for 3 output and 3 input data (for all three models)  153
Table 4.7  MSD results for 3 output and 3 input data (for all three models)  153
Table 4.8  Branch Data and Results  155
Table 4.9  Spearman’s Rank test results for branch data (for all three models)  155
Table 4.10  MSD results for branch data (for all three models)  156
Table 4.11  PSU Bank Data and Results for ERM-DT, CRS-DEA and SDEA  157
Table 4.12  Spearman’s Rank test results for PSU Bank data (for all three models)  158
Table 4.13  MSD results for PSU Bank data (for all three models)  159
Table 5.1  Hypothetical data with 2 outputs and 2 inputs  176
Table 5.2  Technical efficiency of DMUs for different dimensions  177
Table 5.3  Pearson’s correlation coefficient  177
Table 5.4  Block structure  178
Table 5.5  Set ‘C’ of final criteria  179
Table 5.6  Normalized and weighted normalized scores on both the criteria  179
Table 5.7  ERM-ST ranks with 2 outputs and 2 inputs  180
Table 5.8  Summary of results for 2 output and 2 input data  181
Table 5.9  Spearman’s rank test results for 2 output and 2 input data (for all three models)  182
Table 5.10  MSD results for 2 output and 2 input data (for all three models)  182
Table 5.11  Hypothetical data with 3 outputs and 3 inputs  183
Table 5.12  Technical efficiency of DMUs for different dimensions  185
Table 5.13  Pearson’s correlation coefficient  
Table 5.14  Block structure  
Table 5.15  Set ‘C’ of final criteria  
Table 5.16  Normalized and weighted normalized scores on both the criteria  
Table 5.17  ERM-ST ranks with 3 outputs and 3 inputs  
Table 5.18  Summary of results for 3 output and 3 input data  
Table 5.19  Spearman’s rank test results for 3 output and 3 input data (for all three models)  
Table 5.20  MSD results for 3 output and 3 input data (for all three models)  
Table 5.21  PSU Bank data with 2 outputs and 2 inputs  
Table 5.22  Technical efficiency of PSU Banks for different dimensions  
Table 5.23  Pearson’s correlation coefficient (PSU Banks)  
Table 5.24  Block structure (PSU Banks)  
Table 5.25  Block Diagonal structure (PSU Banks)  
Table 5.26  Set ‘C’ of final criteria (PSU Banks)  
Table 5.27  Normalized and weighted normalized scores on both the criteria  
Table 5.28  ERM-ST ranks with 2 outputs and 2 inputs (PSU Banks)  
Table 5.29  Summary of results for 2 output and 2 input data (PSU Banks)  
Table 5.30  Spearman’s Rank test results for PSU Bank data with 2 output and 2 input data (for all three models)  
Table 5.31  MSD results for PSU Bank data with 2 output and 2 input data (for all three models)  
Table 6.1  Hypothetical data with 2 outputs and 2 inputs  
Table 6.2  Computation of SSD-I and SSD-O scores (2 outputs and 2 inputs)  
Table 6.3  Ranks using ERM-SSD, CRS-DEA and SDEA (2 outputs and 2 inputs)  
Table 6.4  Spearman’s Rank test results for 2 output and 2 input data (for all three models)  
Table 6.5  MSD results for 2 output and 2 input data (for all three models)  
Table 6.6  Hypothetical data with 3 outputs and 3 inputs  
Table 6.7  Computation of SSD-I and SSD-O scores (3 outputs and 3 inputs)  
Table 6.8  Ranks using ERM-SSD, CRS-DEA and SDEA (3 outputs and 3 inputs)  
Table 6.9  Spearman’s Rank test results for 3 output and 3 input data (for all three models)
