<tbody>
<tr>
<td>2.1</td>
<td>Syntax for Strategy – I Making Familiar Strange (Creating Something New)</td>
<td>43</td>
</tr>
<tr>
<td>2.2</td>
<td>Syntax for Strategy – II Making Strange Familiar</td>
<td>44</td>
</tr>
<tr>
<td>4.1</td>
<td>Table showing constitution of Levels and Numbers</td>
<td>130</td>
</tr>
<tr>
<td>4.2</td>
<td>Schedule of Experimentation</td>
<td>134</td>
</tr>
<tr>
<td>4.3</td>
<td>Schematic Representation of Factorial design</td>
<td>137</td>
</tr>
<tr>
<td>5.1</td>
<td>Classwise distribution of items in THMAS</td>
<td>141</td>
</tr>
<tr>
<td>5.2</td>
<td>Test – Retest Reliabilities for factor scores and the Total Creativity score for N=31 as reported by the author</td>
<td>143</td>
</tr>
<tr>
<td>5.3</td>
<td>Concurrent Validity coefficients against Teacher ratings for each factor (N= 100) as reported by the author Baqer Mehdi (1977)</td>
<td>143</td>
</tr>
<tr>
<td>5.4</td>
<td>Split-Half reliabilities of the translated tools</td>
<td>144</td>
</tr>
<tr>
<td>5.5</td>
<td>Comparison of difficulty values of urban, rural and combined samples for selection and rejection of items</td>
<td>149</td>
</tr>
<tr>
<td>5.6</td>
<td>Comparison of discriminatory powers of urban, rural and combined samples for selection and rejection of items</td>
<td>150</td>
</tr>
<tr>
<td>5.7</td>
<td>Problem Solving Ability Test (PSAT) point biserial values for discriminatory powers and difficulty values to select and reject the test items through graphical method</td>
<td>151</td>
</tr>
<tr>
<td>5.8</td>
<td>Tabulated Split Half Reliability values on different methods for the selected 15 items from the Phase – II Problem Solving Ability Test</td>
<td>154</td>
</tr>
<tr>
<td>5.9</td>
<td>Item Validities for the selected items of the Problem Solving Ability Test</td>
<td>156</td>
</tr>
<tr>
<td>5.10</td>
<td>Different Split Half Reliabilities for the Problem Solving Ability Test – Final Stage</td>
<td>157</td>
</tr>
<tr>
<td>6.1</td>
<td>Summary table of obtained ‘t’ - values and their significance with reference to all the dependent variables on Pre – Test Scores of Rural Experimental and Control Samples</td>
<td>164</td>
</tr>
</tbody>
</table>
6.2 Summary table of obtained ‘t’ - values and their significance with reference to all the dependent variables on Pre – Test Scores of Urban Experimental and Control Samples

6.3 Obtained ‘t’ values on Post – Test scores and their significance with reference to “RURAL” Experimental and Control groups’ FLUENCY – a Component of Creativity

6.4 ANOVA table on Post Test scores of FLUENCY for the interpretation of Interaction between “Gender” and “Levels of the Students” in Rural Groups

6.5 ANOVA Table on Post Test scores of FLUENCY for the interpretation of Interaction between “Gender” and “Groups” in Rural students

6.6 ANOVA table on Post Test scores of FLUENCY for the interpretation of Interaction between “Levels of the Students” and “Groups” in rural students

6.7 ANOVA table on Post Test scores of FLUENCY for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in Rural students

6.8 Obtained ‘t’ values on Post – Test scores and their significance with reference to “URBAN” Experimental and Control group’s FLUENCY – a Component of Creativity

6.9 ANOVA table on Post Test scores of FLUENCY for the interpretation of Interaction between “Gender” and “Levels of the Students” in Urban Groups

6.10 ANOVA Table on Post Test scores of FLUENCY for the interpretation of Interaction between “Gender” and “Groups” in Urban students

6.11 ANOVA table on Post Test scores of FLUENCY for the interpretation of Interaction between “Levels of the Students” and “Groups” in Urban students

6.12 ANOVA table on Post Test scores of FLUENCY for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in Urban students

6.13 ANOVA table on Post Test FLUENCY scores for the interpretation of Interaction between “Locality of the School” and “Levels of the Students” in Whole Experimental Groups
6.14 ANOVA table on Post Test FLUENCY scores for the interpretation of Interaction between “Locality of the School” and “Genders” in Whole Experimental Groups

6.15 ANOVA table on Post Test FLUENCY scores for the interpretation of Interaction between “Levels of the Students” and “Genders” in Whole Experimental Groups

6.16 ANOVA table on Post Test FLUENCY scores for the interpretation of Interaction between “Locality of the schools”, “Levels of the Students” and “Genders” in Whole Experimental Groups

6.17 Obtained ‘t’ values on Post – Test scores and their significance with reference to “RURAL” Experimental and Control groups

FLEXIBILITY – a Component of Creativity

6.18 ANOVA table on Post Test scores of FLEXIBILITY for the interpretation of Interaction between “Gender” and “Levels of the Students” in Rural Groups

6.19 ANOVA Table on Post Test scores of FLEXIBILITY for the interpretation of Interaction between “Gender” and “Groups” in Rural students

6.20 ANOVA table on Post Test scores of FLEXIBILITY for the interpretation of Interaction between “Levels of the Students” and “Groups” in Rural students

6.21 ANOVA table on Post Test scores of FLEXIBILITY for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in rural students

6.22 Obtained ‘t’ values on Post – Test scores and their significance with reference to “URBAN” Experimental and Control group’s

FLEXIBILITY – a Component of Creativity

6.23 Summary table of GAIN IN FLEXIBILITY of Urban Experimental and Control Groups

6.24 ANOVA table on Post Test scores of FLEXIBILITY for the interpretation of Interaction between “Gender” and “Levels of the Students” in Urban Groups

6.25 ANOVA Table on Post Test scores of FLEXIBILITY for the interpretation of Interaction between “Gender” and “Groups” in Urban students

6.26 ANOVA table on Post Test scores of FLEXIBILITY for the interpretation of Interaction between “Levels of the Students” and “Groups” in Urban students

6.27 ANOVA table on Post Test scores of FLEXIBILITY for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in Urban students

6.28 ANOVA table on Post Test FLEXIBILITY scores for the interpretation of Interaction between “Locality of the School” and “Levels of the Students” in Whole Experimental Groups

6.29 ANOVA table on Post Test FLEXIBILITY scores for the interpretation of Interaction between “Locality of the School” and “Genders” in Whole Experimental Groups

6.30 ANOVA table on Post Test FLEXIBILITY scores for the interpretation of Interaction between “Levels of the Students” and “Genders” in Whole Experimental Groups

6.31 ANOVA table on Post Test FLEXIBILITY scores for the interpretation of Interaction between “Locality of the schools”, “Levels of the Students” and “Genders” in Whole Experimental Groups

6.32 Obtained ‘t’ values on Post–Test scores and their significance with reference to “RURAL” Experimental and Control groups

ORIGINALITY – a Component of Creativity

6.33 ANOVA table on Post Test scores of ORIGINALITY for the interpretation of Interaction between “Gender” and “Levels of the Students” in Rural Groups

6.34 ANOVA Table on Post Test scores of ORIGINALITY for the interpretation of Interaction between “Gender” and “Groups” in Rural students

6.35 ANOVA table on Post Test scores of ORIGINALITY for the interpretation of Interaction between “Levels of the Students” and “Groups” in Rural students

6.36 ANOVA table on Post Test scores of ORIGINALITY for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in Rural students
6.37 Obtained ‘t’ values on Post – Test scores and their significance with reference to “URBAN” Experimental and Control group’s ORIGINALITY – a Component of Creativity 203

6.38 ANOVA table on Post Test scores of ORIGINALITY for the interpretation of Interaction between “Gender” and “Levels of the Students” in Urban Groups 204

6.39 ANOVA Table on Post Test scores of ORIGINALITY for the interpretation of Interaction between “Gender” and “Groups” in Urban students 205

6.40 ANOVA table on Post Test scores of ORIGINALITY for the interpretation of Interaction between “Levels of the Students” and “Groups” in Urban students 206

6.41 ANOVA table on Post Test scores of ORIGINALITY for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in Urban students 207

6.42 ANOVA table on Post Test ORIGINALITY scores for the interpretation of Interaction between “Locality of the School” and “Levels of the Students” in Whole Experimental Groups 208

6.43 ANOVA table on Post Test ORIGINALITY scores for the interpretation of Interaction between “Locality of the School” and “Genders” in Whole Experimental Groups 209

6.44 ANOVA table on Post Test ORIGINALITY scores for the interpretation of Interaction between “Levels of the Students” and “Genders” in Whole Experimental Groups 211

6.45 ANOVA table on Post Test ORIGINALITY scores for the interpretation of Interaction between “Locality of the schools”, “Levels of the Students” and “Genders” in Whole Experimental Groups 212

6.46 Obtained ‘t’ values on Post – Test scores and their significance with reference to “RURAL” Experimental and Control groups COMPOSITE CREATIVITY 213

6.47 ANOVA table on Post Test scores of COMPOSITE CREATIVITY for the interpretation of Interaction between “Gender” and “Levels of Students” in Rural Groups 214

6.48 ANOVA Table on Post Test scores of COMPOSITE CREATIVITY for the interpretation of Interaction between “Gender” and “Groups” in Rural students 216
| 6.49 | ANOVA table on Post Test scores of COMPOSITE CREATIVITY for the interpretation of Interaction between “Levels of the Students” and “Groups” in Rural students | 217 |
| 6.50 | ANOVA table on Post Test scores of COMPOSITE CREATIVITY for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in Rural students | 218 |
| 6.51 | Obtained ‘t’ values on Post – Test scores and their significance with reference to “URBAN” Experimental and Control group’s COMPOSITE CREATIVITY – a Component of Creativity | 219 |
| 6.52 | ANOVA table on Post Test scores of COMPOSITE CREATIVITY for the interpretation of Interaction between “Gender” and “Levels of the Students” in Rural Groups | 220 |
| 6.53 | ANOVA Table on Post Test scores of COMPOSITE CREATIVITY for the interpretation of Interaction between “Gender” and “Groups” in Urban students | 222 |
| 6.54 | ANOVA table on Post Test scores of COMPOSITE CREATIVITY for the interpretation of Interaction between “Levels of the Students” and “Groups” in Urban students | 223 |
| 6.55 | ANOVA table on Post Test scores of COMPOSITE CREATIVITY for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in Urban students | 224 |
| 6.56 | ANOVA table on Post Test COMPOSITE CREATIVITY scores for the interpretation of Interaction between “Locality of the School” and “Levels of the Students” in Whole Experimental Groups | 225 |
| 6.57 | ANOVA table on Post Test COMPOSITE CREATIVITY scores for the interpretation of Interaction between “Locality of the School” and “Genders” in Whole Experimental Groups | 226 |
| 6.58 | ANOVA table on Post Test COMPOSITE CREATIVITY scores for the interpretation of Interaction between “Levels of the Students” and “Genders” in Whole Experimental Groups | 228 |
| 6.59 | ANOVA table on Post Test COMPOSITE CREATIVITY scores for the interpretation of Interaction between “Localities of the schools”, “Levels of the Students” and “Genders” in Whole Experimental Groups | 229 |
| 6.60 | Obtained ‘t’ values on Post – Test scores and their significance with reference to “RURAL” Experimental and Control groups PROBLEM SOLVING ABILITY | 230 |
6.61 Summary table of obtained ‘t’ - values on Pre – Test and Post - Test scores and their significance with reference to PROBLEM SOLVING ABILITY of Rural Experimental and Control Samples

6.62 ANOVA table on Post Test scores of PROBLEM SOLVING ABILITY for the interpretation of Interaction between “Gender” and “Levels of the Students” in Rural Groups

6.63 ANOVA Table on Post Test scores of PROBLEM SOLVING ABILITY for the interpretation of Interaction between “Gender” and “Groups” in Rural students

6.64 ANOVA table on Post Test scores of PROBLEM SOLVING ABILITY for the interpretation of Interaction between “Levels of the Students” and “Groups” in Rural students

6.65 ANOVA table on Post Test scores of PROBLEM SOLVING ABILITY for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in Rural students

6.66 Obtained ‘t’ values on Post – Test scores and their significance with reference to “URBAN” Experimental and Control group’s PROBLEM SOLVING ABILITY

6.67 ANOVA table on Post Test scores of PROBLEM SOLVING ABILITY for the interpretation of Interaction between “Gender” and “Levels of the Students” in Urban Groups

6.68 ANOVA Table on Post Test scores of PROBLEM SOLVING ABILITY for the interpretation of Interaction between “Gender” and “Groups” in Urban students

6.69 ANOVA table on Post Test scores of PROBLEM SOLVING ABILITY for the interpretation of Interaction between “Levels of the Students” and “Groups” in Urban students

6.70 ANOVA table on Post Test scores of PROBLEM SOLVING ABILITY for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in Urban students

6.71 ANOVA table on Post Test PROBLEM SOLVING ABILITY scores for the interpretation of Interaction between “Locality of the School” and “Levels of the Students” in Whole Experimental Groups

6.72 ANOVA table on Post Test PROBLEM SOLVING ABILITY scores for the interpretation of Interaction between “Locality of the School” and “Genders” in Whole Experimental Groups
6.73 ANOVA table on Post Test PROBLEM SOLVING ABILITY scores for the interpretation of Interaction between “Levels of the Students” and “Genders” in Whole Experimental Groups 246

6.74 ANOVA table on Post Test PROBLEM SOLVING ABILITY scores for the interpretation of Interaction between “Locality of the schools”, “Levels of the Students” and “Genders” in Whole Experimental Groups 247

6.75 Obtained ‘t’ values on Post – Test scores and their significance with reference to “RURAL” Experimental and Control groups ATTITUDE TOWARDS SCIENCE 248

6.76 ANOVA table on Post Test scores of ATTITUDE TOWARDS SCIENCE for the interpretation of Interaction between “Gender” and “Levels of the Students” in Rural Groups 249

6.77 ANOVA Table on Post Test scores of ATTITUDE TOWARDS SCIENCE for the interpretation of Interaction between “Gender” and “Groups” in Rural students 250

6.78 ANOVA table on Post Test scores of ATTITUDE TOWARDS SCIENCE For the interpretation of Interaction between “Levels of the Students” and “Groups” in Rural students 251

6.79 ANOVA table on Post Test scores of ATTITUDE TOWARDS SCIENCE for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in Rural students 252

6.80 Obtained ‘t’ values on Post – Test scores and their significance with reference to “URBAN” Experimental and Control group’s ATTITUDE TOWARDS SCIENCE 253

6.81 ANOVA table on Post Test scores of ATTITUDE TOWARDS SCIENCE for the interpretation of Interaction between “Gender” and “Levels of the Students” in Urban Groups 254

6.82 ANOVA Table on Post Test scores of ATTITUDE TOWARDS SCIENCE for the interpretation of Interaction between “Gender” and “Groups” in Urban students 256

6.83 ANOVA table on Post Test scores of ATTITUDE TOWARDS SCIENCE for the interpretation of Interaction between “Levels of the Students” and “Groups” in Urban students 257

6.84 ANOVA table on Post Test scores of ATTITUDE TOWARDS SCIENCE for the interpretation of Interaction between “Genders”, “Levels of the Students” and “Groups” in Urban students 258
6.85 ANOVA table on Post Test ATTITUDE TOWARDS SCIENCE scores for the interpretation of Interaction between “Locality of the School” and “Levels of the Students” in Whole Experimental Groups

6.86 ANOVA table on Post Test ATTITUDE TOWARDS SCIENCE scores for the interpretation of Interaction between “Locality of the School” and “Genders” in Whole Experimental Groups

6.87 ANOVA table on Post Test ATTITUDE TOWARDS SCIENCE scores for the interpretation of Interaction between “Levels of the Students” and “Genders” in Whole Experimental Groups

6.88 ANOVA table on Post Test ATTITUDE TOWARDS SCIENCE scores for the interpretation of Interaction between “Locality of the schools”, “Levels of the Students” and “Genders” in Whole Experimental Groups

6.89 Obtained ‘t’ - values and their significance with reference to Post – test and Delayed Post test scores on the DEPENDENT VARIABLES of Rural Experimental Group (N=30)

6.90 Obtained ‘t’ - values and their significance with reference to Delayed Post test scores on DEPENDENT VARIABLES of Rural Boys and Rural Girls from Experimental Group (N=15)

6.91 Obtained ‘t’ - values and their significance with reference to Post– test and Delayed Post test scores on the DEPENDENT VARIABLES of Urban Experimental Group (N=30)

6.92 Obtained ‘t’ - values and their significance with reference to Delayed Post test scores on DEPENDENT VARIABLES of Urban Boys and Urban Girls from Experimental Group (N=15)

6.93 Obtained ‘t’ - values and their significance with reference to Delayed Post test scores on DEPENDENT VARIABLES of Urban and Rural Experimental Groups (N=60)

7.1 Constitution of Levels in each group based on T – Scores of Raven’s Standard Progressive Matrices Test (SPM) and Dr. Sansanwal and Dr. Anuradha Joshi’s “Test of Higher Mental Ability in Science” (THMAS)

7.2 The different tools adopted and their – Reliability and Validity
