Acknowledgements

There is a dreamer hidden in each one of us and I thank GOD for making me lucky enough to sustain my dreams as well as my ambitions. It is only because of the blessing of the “Almighty” I have been able to complete this work.

In the last five years, I have learnt that research is a journey. In many ways similar to journey of life in which hope, adventure, joy, pride and disappointments all meet you in equal measures. To complete the multiyear task like PhD is not possible without the help and guidance of mentors, many seasoned experts, colleagues and other technical persons and my task was not an exception. So, to me this acknowledgement presentation is not only a ceremonial but an opportunity to voice my gratitude for all those who have lent helping hands to culminate this task.

It exceeds my bliss height in expressing my deep sense of gratitude to my Supervisor Prof. AK Srivastava, Head, Department of Biosciences, Integral University, Lucknow, for his constant support, encouragement and guidance in my research work. Without his valuable supervision and guidance this work would not be possible.

I take this privilege to express my deepest regards and gratitude to my Co-supervisor Dr. A B Pant, Senior Scientist, Indian Institute of Toxicology Research (IITR), Lucknow, who has not only been my Co-supervisor, but also perennial source of inspiration in all my endeavors. I will never find the words to thank him for his time, the only thing in the world we (still) cannot buy, and I much regret the fact that I will have little chance to pay him back for all his personal dedication. Sir I am very thankful to you for your constant support, encouragement and supreme guidance. It is beyond thought the number of the qualities that he has evoked in me during this period of my PhD by his excellent way of teaching and discussion. His habit of not spoon feeding his students is one thing that deserves a special mention, it is because of the independence and liberty of thought provided by him, his student can stand alone to face the endeavor of science and research. I believe it will be the driving force to accept all the challenges cheerfully in all my future accomplishments. Thanks you very much Sir.

My highest gratitude of deep sense of thanks to Prof. Sandeep Kumar, Director, AIIMS, Bhopal, who taught me the first letter of research and literally brought me into the CSIR Laboratory i.e., CSIR-IITR, one among the best research councils in the country.

I also acknowledge Drs. Ashwini Kumar, Former Acting Director and KC Gupta, Director, CSIR-IITR, for providing the necessary Laboratory facilities and their keen interest in the work.
I do sincerely thank the Honorable Vice Chancellor, Prof. Syed Waseem Akhtar and Registrar, Dr. Irfan Ali Khan, Integral University, Lucknow for giving me the opportunity for PhD enrolment.

I thank to Prof. T. Usmani, Chairman of RDC Committee, Prof. Abdul Rahman Khan, Dean of Applied Sciences, Dr. Rizwan Beg, Controller of Examinations, Mr. Gufran Ahmad, Academic coordinator and Mr. Afzal, Integral University, Lucknow, for suggestions to improve the scientific quality of the entire thesis.

I would like to convey my sincere thanks to Drs. D Parmar, VK Khanna, VP Sharma, Y Shukla, I Ahamad, Rajnish Chaturvedi, Kavita Seth and Sanjay Yadav Scientists, IITR, Lucknow, for extending their support, suggestion and encouragements.

Words are insufficient to praise the total support of my dear friend and senior colleagues Drs. Maqsood Ahmad Siddiqui, Govind Singh, Mahendra Pratap Kashyap, Ritesh Kumar Srivastava, Rituraj Nirajan, Rajesh Singh Yadav, Anurag Sharma and Megha Agrawal whose affectionate behavior has supported me through the course of this investigation.

It’s a matter of great pleasure to express my thanks to my colleagues Vinay Tripathi, Sadaf Jahan, Ankita Pandey, Parul Singh, Abhishek Jauhari, Tanisha, Deepak, Akriti Srivastava and Ankita Pandey for their valuable help and cooperation throughout my stay in Lucknow.

Few names are there, who were instrumental all through the completion of this task and otherwise also made my perineal stay in Lucknow, as sweet memories of my life. These Lieutenants of my army are: Amit Gupta, Khan Bhai, Rajendra Shukla, Mohd Kamil Hussain, Pranay Srivastava, Jasmine George, Prachi Gupta, Satya Prakash Gupta, Sarang Talwelker, Asit Rai, Shailendra Muraya, Amit Srivastava, Shivpoojan, Andleeb Khan, Richa Gupta, Ansh Shukla, Shailendra Shankar Maurya, Manuraj Pandey, Lalit Pratap Singh, Shivam Shukla, Sanjay Mishra, Shankar Suman and Anju Suryawansi.

I feel great pleasure and completeness due to Abaidha Nath Singh, Chandra Mohan Singh, Gautam Chawla, Saurav Kalra, Vinod Kumar Chaudhary, Shariq Khan and Vijay Chauhan who always ignited, encouraged and supported me during hard times.

I would not forget to mention the technical support provided by Mr. Rajesh Mishra, and Mr. Dharmendra.

Though, I am indebted to many people for their great help and support but the chief contributors are undoubtedly my parents. Today, whatever I am, and tomorrow will be, it entirely bears the stamps of their love, encouragement, and sacrifices beyond their limits. They are the unparallel source of
inspiration and real role models to me. This is only their blessings, untiring efforts and sacrifices that today their dreams come true. My vocabulary is not wide enough to put my sentiments in words to repay them for what they have done to groom me in such a great fashion.

I would like to put on record that the love, affection and support extended by my brother Dr. Amit Gupta, my sisters Sushma, Arachana, Aarti and brother-in-law cannot be ignored and deeply attested herewith.

Financial support from Indian council of Medical Research (ICMR), New Delhi, and Council of scientific & Industrial Research (CSIR), New Delhi, is acknowledged.

Lastly, I wish to offer my heartfelt thanks to all, whose names could not be included, but will be fondly remembered.

Vivek Kumar
