CONTENTS

I. PORPHYRINS, POLYMERIC PORPHYRINS AND THEIR METALLODERIVATIVES

1. Introduction 1
2. The Porphyrin System 3
3. Porphyrins as Catalysts 9
4. Porphyrins as Biological Models 19
5. Polymeric Porphyrins 29
6. Objectives of the Present Work 40

II. MATERIALS AND METHODS 43

1. Reagents 43
2. Spectral Methods 43
   (a) Infrared Spectra 43
   (b) Electronic Spectra 44
   (c) ESR Spectra 44
   (d) NMR Spectra 44
   (e) Scanning Electron Microscopy 44
3. Chromatographic Purifications 45
4. Preparative Details 45
5. Polymer Supports
   (a) 2% DVB-crosslinked polystyrene 45
   (b) 2% DVB-crosslinked chloromethyl polystyrene 46
   (c) Estimation of chlorine capacity 46
   (d) 2% DVB-crosslinked polybenzaldehyde 47
   (e) 2% DVB-crosslinked poly(4-vinyl pyridine) 47
   (f) 2% DVB-crosslinked polymeric pyridinium chloride 48
   (g) 2% DVB-crosslinked benzyl poly(vinyl pyridinium) chloride 49
6. Porphyrin Systems
   (a) 5,10,15,20-Tetrakis(nitrophenyl)porphyrins: General procedure 49
   (b) 5,10,15,20-Tetrakis(aminophenyl)porphyrins: General procedure 50
   (c) 5-(Nitrophenyl),10,15,20-triphenylporphyrins: General procedure 50
   (d) 5-(Aminophenyl),10,15,20-triphenylporphyrins: General procedure 51
   (e) 5,10,15,20-Tetrakis(hydroxyphenyl)porphyrins: General procedure 52
   (f) 5-(Hydroxyphenyl),10,15,20-triphenylporphyrins: General procedure 52
   (g) 5,10,15,20-Tetraphenylporphyrins 53
   (h) Sodium 5,10,15,20-tetrakis(4-sulphophenyl)porphyrin 53
7. Polymer-Bound Porphyrins

(a) Polymer-bound porphyrins, [AI]: General procedure 54
(b) Polymer-bound porphyrins, [AI'] General procedure 55
(c) Polymer-bound porphyrins, [BI]: General procedure 55
(d) Polymer-bound porphyrins, [BI'] General procedure 56
(e) Polymer-bound porphyrins, [AII]: General procedure 56
(f) Polymer-bound porphyrins, [AII'] General procedure 57
(g) Polymer-bound porphyrins, [DIII]: General procedure 57
(h) Polymer-bound porphyrins, [EIII] General procedure 58

8. Polymer-Bound Metalloporphyrins

(a) Method 1: General procedure 58
(b) Method 2: General procedure 59

9. Catalytic Studies: General Procedure

III. SYNTHESIS AND CHARACTERISATION OF POLYMER-BOUND FREE BASE Porphyrins

Results and Discussion

1. The Polymer Supports

(a) 2% DVB-crosslinked polystyrene 64
(b) Chloromethyl polystyrene 65
(c) Polymeric aldehyde 66
(d) 2% DVB-crosslinked poly(4-vinyl pyridine) 67
(e) Polymeric pyridinium chloride 68
(f) Benzyl poly(vinyl pyridinium) chloride 69

2. Porphyrin Systems

(a) 5,10,15,20-Tetrakis(aminophenyl)porphyrins 71
(b) 5-(Aminophenyl),10,15,20-triphenyl porphyrins 73
(c) 5,10,15,20-Tetrakis(hydroxyphenyl)porphyrins 75
(d) 5-(Hydroxyphenyl),10,15,20-triphenyl porphyrins 75
(e) Sodium 5,10,15,20-tetrakis(4-sulphophenyl)porphyrin 77

3. Polymer-Bound Porphyrins

4. Strategy to Effect Distortional Variation on Porphyrins

5. Flexibly Bound Systems

(a) Polymer-bound porphyrins AI 84
(b) Polymer-bound porphyrins AI' 90
(c) Polymer-bound porphyrins AII 94
(d) Polymer-bound porphyrins AII' 98
IV. COPPER(II) AND SILVER(II) COMPLEXES OF PORPHYRINS GRAFTED ON POLYMER SUPPORTS IN DIVERSE LINKING MODES

Results and Discussion

1. Copper Complexes of Polymer-Bound Porphyrins
   (a) Copper complexes of AI
   (b) Copper complexes of AI'

2. Flexibly Bound Systems
   (a) Copper complexes of BI
   (b) Copper complexes of BI'

3. Rigidly Bound Systems
   (a) Copper complexes of BI
   (b) Copper complexes of BI'

4. Silver Complexes of Polymer-Bound Porphyrins
   (a) Silver complexes of AI
   (b) Other flexibly bound systems

5. Flexibly Bound Systems
   (a) Silver complexes of AI
   (b) Other flexibly bound systems

6. Rigidly Bound Systems
   (a) Copper and silver complexes of DIII
   (b) Copper and silver complexes of EIII

V. COBAL(T) COMPLEXES OF PORPHYRINS GRAFTED ON POLYMER SUPPORTS IN DIVERSE LINKING MODES

Results and Discussion

1. Flexibly Bound Systems
   (a) Cobalt complexes of AI
   (b) Cobalt complexes of AI'
   (c) Cobalt complexes of AII
2. Rigidly Bound Systems
   (a) Cobalt complexes of BI
   (b) Cobalt complexes of BI'

3. Ionically Bound Systems
   (a) Cobalt complexes of DIII and EIII

4. Catalytic Studies

VI. CONCLUSION AND OUTLOOK
