ACKNOWLEDGEMENT

“God’s guiding and leading and he alone knowing the things we are most needing”

With thanks and praise for the kindness and care, the great almighty has given which leads to the completion of the work. I also extend some thoughtful words of gratitude and feeling of praise for those brilliant minds and helping hands that lent me in my hour of need and helped in a way that shall be remembered and cherished forever’s. I greatly appreciate the wisdom with which their efforts have enriched the study.

I extend my heartfelt thanks and profound gratitude to Dr. Mahipal Singh, Ph.D (N), Principal, Akhil Bhartividyapeeth College of Nursing, Jaipur, Rajasthan for his endless efforts and valuable guidance which enlightened my path to complete this study systematically. I feel proud to have a guide as him, who is so much helping and supportive. He is a dedicated teacher and having sound scientific knowledge regarding nursing. I express my deepest regard and sincere gratitude to him for his sustained patience, genuine concern, continuous encouragement, unending support throughout the study and made me accomplish this study.

I extend my sincere thanks to Dr. Omprakash, Ph.D (Biomed), Allied Health Science. JJTU, Rajasthan for his kind support, constant guidance and expertise constructive suggestions in the successful completion of the study.

I am grateful to Bombay Hospital Management for extending valuable help and forwarding the letters and providing timely support for the study. My heartfelt thanks are expressed to all experts who so willingly spare their most valuable time for content validation of the tool.

I acknowledge my sincere thanks to teaching faculty members of Bombay Hospital College of Nursing especially to Ms Linu Sam, Ms Tessy Mathew and Mr. Rijo J Varghese for their suggestions and constructive criticism at every phase of study. Their millions worth teaching will serve as foundation. I
am indebted to all of them. I am thankful to all authorities for granting me permission to conduct the study.

My sincere thanks to Dr. Namdev, Ph.D, for his assistance in statistical analysis of the data. A special thanks is expressed to Mr. Chandresh Chatwani, Librarian, Bombay Hospital College of Nursing, for extending help in literature review and library facilities through out the study.

A special note of thanks to my husband Mr. Prince R. Raghavan for his unwavering support, motivation and assistance in formulating the manuscript and constant encouragement without which this dream of mine could never have been realized. I also thank my wonderful child Mast. Darsh, for always making me smile during my tensed moments of this research.

It would be a gracious lapse on my part if I do not thanks all the geriatric population who participated in the study and without their cooperation the study would have remain as my dream. Parents are the blessing made of love, trust and care that cannot fade or die. I am very much grateful to my beloved parents Late Shri. M.P. Sasidharan and Mrs. Vilasini S. and my loving parent in-laws, Late Shri. Ragunadhan R. and Mrs. Chellamma R. I am also grateful to my loving brother Mr. M.S. Vinson and my sister in-law Mrs. Priya R and my aunt Dr. Geetha S. for their constant encouragement, unending love, faith, understanding without them this study would have been impossible.

I offer a word of cheer to all my friends specially Mrs. Viji Avasthi, Mrs Janula Raju and Dr. Priyanka C. and well wishers who assisted, guided and cooperated with me directly or indirectly for completion of the present study.

Above all, I bow my head and heart before almighty God and express my gratitude to him for his abiding grace and for being the guiding force behind my work.

With many thanks
Mrs.M.S. Vinsi
