ACKNOWLEDGEMENT

My sincere thanks are due to Dr. R. K. Ranjan Singh for his kind supervision and inspiration in every step in bringing this thesis to its logical end.

I am also grateful to Professor, A. T. A. Learmonth Open University, U.K.; Professor, M. D. McGlashan, University of Tasmania, Australia; Professor, R. W. Armstrong, U.S.A. and Professor, M. Prothero, University of Liverpool, U.K. for their very valuable suggestion and reprints provided to me. I also thank Dr. A. Retindramohon Singh, Medical Officer, NLEP and Dr. A. Amujao Singh, Assistant Director, NMEP and their staff for supplying me very valuable information and data whenever I have sought for.

I am grateful to the Director, World Health Organisation, Regional Office for South-East Asia, New Delhi for his kind permission to quote the data reproduce maps from the book WHO Regional Publication, South-East Asia Series No:17, Epidemiological Considerations for Planning Malaria Control in South-East Asia Region supplied to me by him.
I extend my indebtedness to Dr. R.K. Narendrajit Singh, Assistant Professor-cum-Statistician, R.M.C. for his valuable suggestion and helps provided to me in computing the data incorporated in the thesis.

My thanks also due to Professor, M. Borthakur, Gauhati University and Professor, B. Banerjee, Calcutta University for their valuable suggestion and helps rendered in giving final shape to the thesis.

Last, but not the least, I am very thankful to my colleagues for their valuable support and inspiration.

(R.K. Somorjit Singh)
