PREFACE

The research work entitled "Role of the Government and Voluntary Organisations in the Education of Mentally Retarded Children in Manipur" was undertaken for the study. This study is presented in a concise and logical manner on the basis of information collected during the study. This study will give some insights about the role of the education and its impacts on the mentally retarded students. Moreover, it can give a general awareness to the general public and other scholars about likely consequences relating to the development of the mentally retarded children.

The study has been divided into six (6) chapters.

Chapter I describes about the introduction of mental retardation and design of the study.

Chapter II discusses on the review of the related literature of the works done on mental retardation.

Chapter III studies about the Governmental role in the formation of the national policies and acts on the education of the mentally retarded children.

Chapter IV describes about the role of the State Government and the Voluntary Organisations working for the mentally retarded children.

Chapter V gives the analytical study of the students, special educators, principals and the organisers of the institutions.
Chapter VI gives the summary of the findings and conclusion.

This report was prepared on the basis of the information collected during the course of the research work. The information collected will be used only for the academic purpose.

Thanking you.

Kangjam Kurangini Devi
