Abstract

CHAPTER 1: PREAMBLE

1.1 Present energy Scenario 2
   1.1.1 Wind energy 11
   1.1.2 Biomass energy 11
1.2 Projected energy consumption of India for 2030 12
1.3 Sun and concept of solar energy 14
   1.3.1 Solar system 14

CHAPTER 2: ORGANIZATION 20

2.1 Computer Science Department 20
   2.1.1 Facilities 21
2.2 Information Science Department 22
   2.2.1 Vision 22
   2.2.2 Mission 22
   2.2.3 Facilities 22
2.3 Electronics and Communication Department 23
   2.3.1 Facilities 23
2.4 Electrical and Electronics Department 24
   2.4.1 Facilities 24
   2.4.2 Center of Excellence 25
2.5 Mechanical Department 26
   2.5.1 Facilities 27
2.6 Basic Science Department 27
CHAPTER 3: PROBLEM HYPOTHESIS

3.1 Introduction

3.1.1 Methods of harnessing of solar energy

3.2 Study of energy losses

3.3 Statement of problem

3.4 Objectives of the study

3.5 ANN analysis technique

3.5.1 Introduction

3.5.2 Introduction to thermo electric device

3.5.3 Seebeck effect

3.5.4 Peltier effect

3.5.5 Thomson effect

3.5.6 Working principle

3.6 Methods of heat transfer

CHAPTER 4: LITERATURE REVIEW

CHAPTER 5: DATA COLLECTION AND ANALYSIS

5.1 Block diagram of experimental setup

5.2 Experimental setup

5.3 Data collection with heat sink and thermocouple

5.4 Data generation without FBG and Thermoelectric device

5.5 Analysis of data

5.6 Behavior of individual parameter

5.7 Data collection using FBG sensor only

5.8 Individual parameter of Heat sink with Thermocouple and FBG

5.9 Data collection with Thermoelectric device

5.10 Graphical analysis of individual parameters with heat sink and thermocouple with FBG
CHAPTER 6: RESULTS AND DISCUSSIONS
6.1 Analysis of heat sink with thermocouple using ANN technique
6.2 Comparison of experimental measured values of Vac and ANN
   Predicted values
   6.2.1 Comparative analysis of the output current Iac versus percentage
   loading
6.3 Comparative analysis of output current Iac v/s Percentage loading
   6.3.1 Average Output current Iac error graph
   6.3.2 Average Temperature error graph
   6.3.3 Average Vac error graph
6.4 Error average graphs
   6.4.1 Average output current error graph
6.5 Analysis of FBG using ANN technique

CHAPTER 7: SUMMARY RECOMMENDATION
7.1 Cost analysis
7.2 Inferences
7.3 Limitations
7.4 Future scope

APPENDIX A: PUBLICATION OF RESEARCH PAPER

APPENDIX B: REFERENCES
