I express my deep sense of gratitude to Dr. H. D. Revanasiddappa, Professor, Department of Chemistry, University of Mysore, Manasagangothri, Mysore for his invaluable guidance, extraordinary patience, continuous encouragement, personal interest and brotherly affection that I received from him throughout my tenure as a research student. I indeed consider myself to be extremely fortunate to have come under the shelter of his scholastic arena, intellectual magnetism, inspiring personality matched by rare combination of human simplicity.

I thank Prof. H. S. Yathirajan, Chairman, Department of Studies in Chemistry for his continuous support throughout my research period.

I greatly indebted to Prof. D. Channe Gowda, BOS Chairman, Department of Chemistry, Manasagangothri, Mysore, for his moral support and encouragement.

I am highly grateful to Prof. K. S. Rangappa, Prof. K. Basavaiah, Prof. K. M. Lokanath Rai, Prof. Nagaraja Naik, Prof. S. Shashikanth, Prof. P. Nagaraj, Prof. S. Ananda, Prof. G. Nagendrappa, Dr. K. N. Mohana and non-teaching staff of the Department of Studies in Chemistry, University of Mysore, Mysore for their cooperation during my stay in this Department.

I sincerely thank the University of Mysore and Department of Chemistry for providing me the necessary facilities for pursuing my research work.

I am thankful to Dr. B. Veeresh, Department of Pharmacology, G. Pullareddy College of Pharmacy, Medhipatnam, Hyderabad for extending the facilities to perform biological evaluation of the synthesized compounds.

I gratefully acknowledge for the assistance and help that is beyond measurement to my research colleagues; Mr. Shiva Kumar L, Ms. Deepakumari H. N, Mr. Prashanth M. K, Mr. Mallegowda S. M and Mr. Vasantha Kumar B. C. of Department of studies in Chemistry, University of Mysore. For their support and co-operation.

Words are inadequate to express my gratitude to my beloved parents who has been the constant source of inspiration to carry on the research and also for efficacious blessings in my endeavors. I extend my acknowledgement with deep sense of
appreciation, the indispensable aid and encouragement for the love and support received from my parents.

My special thanks are also due to my wife and childrens, for their warm and lovely encouragement, who not only tolerates the occupational agonies but also for serving as my keenest critic of my personal life as a whole.

I could not end this preface without an acknowledgement to number of authors whose work have been freely consulted, while writing this thesis.

Finally, there are many colleagues and friends both in Chemistry Department and elsewhere, who encouraged and helped me during the period of this investigation and I hope they will accept my sincere thanks individually and collectively for all they did.

M. Madaiah
