Chapter 1: INTRODUCTION

1.1 Fluids Mechanics: Importance and Applications
1.2 Newtonian Fluids
1.3 Non-Newtonian Fluids
   1.3.1 Purely Viscous Fluids
   1.3.2 Viscoplastic Fluids
   1.3.3 Viscoelastic Fluids
      1.3.3.1 Maxwell Fluid
      1.3.3.2 Oldroyd Fluid
      1.3.3.3 Rivlin-Ericksen Fluid
      1.3.3.4 Walters B' Fluid
1.4 Porous Medium
   1.4.1 Porosity
   1.4.2 Permeability
   1.4.3 Isotropic and Anisotropic Porous Media
1.5 Darcy’s Law
   1.5.1 Limitations and Validity of Darcy’s Law
1.6 Stability Theory: Concept and Techniques
1.7 Mono Diffusive Convection
1.8 Double-diffusive Convection
1.9 Soret Phenomenon
1.10 Dufour Phenomenon
1.11 Hydromagnetic Stability
Chapter 2: THE ONSET OF THERMOSOLUTAL CONVECTION IN A HORIZONTAL ISOTROPIC POROUS LAYER OF AN OLDROYDIAN FLUID 29-54

2.1 Introduction
2.2 Physical Problem and Its Mathematical Formulation
  2.2.1 Basic State
  2.2.2 Perturbed State
2.3 Mathematical Analysis and Dispersion Relation
2.4 Analytical Discussion
  2.4.1 Stationary Convection
  2.4.2 General Discussion
2.5 Numerical Results and Discussion
2.6 Conclusion

Chapter 3: THE ONSET OF THERMOSOLUTAL CONVECTION IN A HORIZONTAL ANISOTROPIC POROUS LAYER OF AN OLDROYDIAN FLUID 55-82

3.1 Introduction
3.2 Physical Problem and Its Mathematical Formulation
  3.2.1 Basic State
  3.2.2 Perturbed State
3.3 Mathematical Analysis and Dispersion Relation
3.4 Stability Analysis
3.5 Analytical Discussion
3.6 Existence of Variational Principle
3.7 Results and Discussion
  3.7.1 Stationary Convection
  3.7.2 Oscillatory Convection
3.8 Conclusion
Chapter 4: SORET DUFOR DRIVEN INSTABILITY OF AN OLDROYDIAN FLUID IN A HORIZONTAL POROUS MEDIUM 83-115

4.1 Introduction
4.2 Physical Problem and Its Mathematical Formulation
   4.2.1 Basic State
   4.2.2 Perturbed State
4.3 Mathematical Analysis and Dispersion Relation
4.4 Case I: Isotropic Porous Medium
4.5 Cases II: Anisotropic Porous Medium
   4.5.1 Stationary Convection
   4.5.2 Oscillatory Convection
4.6 Results and Discussion
4.7 Conclusion

Chapter 5: HYDROMAGNETIC THERMOSOLUTAL INSTABILITY IN A HORIZONTAL POROUS MEDIUM OF AN OLDROYDIAN FLUID 116-143

5.1 Introduction
5.2 Physical Problem and Its Mathematical Formulation
   5.2.1 Basic State
   5.2.2 Perturbed State
5.3 Mathematical Analysis and Dispersion Relation
5.4 Case I: Isotropic Porous Medium
5.5 Case II: Anisotropic Porous Medium
   5.5.1 Stationary Convection
   5.5.2 Oscillatory Convection
5.6 Numerical Results and Discussion
5.7 Conclusion
Chapter 6: SORET DUFOUR DRIVEN HYDROMAGNETIC INSTABILITY OF AN OLDROYDIAN FLUID IN A HORIZONTAL POROUS MEDIUM 144-163

6.1 Introduction
6.2 Physical Problem and Its Mathematical Formulation
6.3 Basic and Perturbed State
6.4 Stationary Convection
6.5 Oscillatory Convection
6.6 Results and Discussion
6.7 Conclusion
