ACKNOWLEDGEMENT

First and foremost, I would like to thank my supervisor Dr. T. Kannadasan, Professor and Head, Department of Chemical Engineering, Coimbatore Institute of Technology, Coimbatore, for having given me the opportunity to work on this research topic. I feel that I have benefited greatly by learning from him, a man of highest scientific intellect and experience.

My sincerest gratitude goes out to Dr. Ahmed Basha (Ret.) Scientist, Pollution Division, Central Electro Chemical Institute, Karaikudi for all his help, guidance and support. His leadership has been both challenging and motivating; he gave crucial information and continuous input and support on a variety of topics related to my work.

I am deeply indebted to Dr. N.S. Badarinarayanan, Dean (Autonomous) and Professor and Head, Department of Chemical Engineering, Adhiyamaan College of Engineering, for his inspiring guidance, support and encouragement throughout the period of research. My sincere thank to Dr. G. Ranganath, Principal, Adhiyamaan College of Engineering for providing lab facilities to do research work. I am deeply indebted to the Management of Coimbatore Institute of Technology, Coimbatore for providing research lab facilities and guidance to do research work.

I owe my sincere thanks to Dr. S. Ramachandran, Principal, Jeyam College of Engineering and Technology, Dharmapuri and Dr. M. Thirumarimurugan, Associate Professor, Department of Chemical Engineering, Coimbatore Institute of Technology, Coimbatore.

I would like to thank my wife, son and daughter for their support for the successful completion of this thesis.

MANOKARAN P
