ACKNOWLEDGEMENTS

The author expresses his deep sense of gratitude to Dr. S. S. Nigam, M.Sc. (Allahabad), Ph.D. (London), Ph.D. (Sagar), D.I.C., F.R.I.C., F.N.A.Sc., Reader in Chemistry, University of Sagar, for his inspiring and able guidance and supervision and his continual encouragement during the course of these investigations, and to Prof. A.K. Bhattacharya, D.Sc., F.R.I.C., F.N.A.Sc., Head of the Department of Chemistry, University of Sagar, for providing laboratory facilities and his keen interest in the progress of the work.

Grateful thanks are also due to

(i) Prof. D.K. Banerjee, Dr. B.H. Iyer, and Dr. G.S. Krishna Rao, of the Indian Institute of Science, Bangalore, for their kindly interest and helpful suggestions,

(ii) Prof. F. Sorm (Czechoslovakia) for kindly providing with the authentic specimens and infra-red spectrograms of Carotol and Daucol,

(iii) Messrs. B.R. Seetharamaiah and D.P. Bose of the Indian Institute of Science, for the microanalyses, and

(iv) Government of Rajasthan for the grant of study leave which enabled the author to undertake this work.
