ACKNOWLEDGMENTS

It is my pleasant duty to make grateful acknowledgment here of my obligations for help received towards the completion of this work. The first and the largest of my debts is to Dr. D.R. Bhashkar, Professor and Head of the Department of Physics, University of Saugar, for his valuable guidance and constant encouragement to me throughout the course of this work. Dr. S. Sivaraman of the Department of Physics, University of Saugar, has placed me under an obligation by the interest he took in my work, both discussing the subject with me on numerous occasions and supervising the typing of the thesis. The samples were prepared in collaboration with Dr. V.B. Agnihotri and Dr. B.L. Rawat, and I am very grateful to them for their friendly cooperation. I am very thankful to Shri S.L. Mor and Shri R.C. Saxena for helping me to prepare the prints.

I am particularly grateful to the Education Department, Government of Madhya Pradesh for granting me study leave to enable me to undertake this research project.
