Acknowledgement

Giant leaps are essentially tentative steps in the beginning. This thesis is the first Ph. D. Thesis being produced by Bhilai Institute of Technology. This Institute, which started in 1986, has certainly made a niche for itself in the Hall of Fame of Education. I am extremely delighted to have been able to add another feather in the cap of this Institute. Hence, my most sincere salutation is to Bhilai Institute of Technology for providing an opportunity to be a part of the wonderland that is BIT. Once, that is admitted I would like to place on record my deep appreciation and sense of gratitude to the Honorary Secretary, Er. I. P. Mishra, Director Prof. B. S. Narang, Ex-Director Prof. B. N. Chatterjee and the entire Administrative Staff for the exemplary support and encouragement which they provided to me both by their kind words and deeds.

Thanking my Guide Dr. Piyush Kant Pandey will be profane hence I would only say that he is the person whom I will revere next to none. His patronage steered me through the most challenging world of environmental sciences. Words are insufficient to cherish the person, Dr. Piyush Kant Pandey. He always stood by me in periods of transition and happiness. He instilled self-confidence in me and will always remain as the parental figure in my memory. I can proudly say whatever I have achieved, whatever I have done, would not have been possible without him.

My profound respect is due to Dr. S. S. Joshi, Professor and Head (Retd.) of CEC, Raipur who is the Leading light to me as well to my own Guide, Dr. Pandey.

I was fortunate to have Dr. Madhurima Pandey, Senior Lecturer, BIT and Dr. S.K. Sar, Senior Lecturer, BIT, as the kind mentors who helped and cared for me in times of need.

My research kith and kin Mrs. Sumita Nair, Mrs. Nilima Mishra, and Shri Ashish K. Bhui deserve my thanks and gratitude for always being helpful.

Words have never been able to express the entire human feelings hence; I am unable to express my gratitude to so many people who gave me a direct or indirect support in this endeavour. I would only convey my heartfelt thanks to Er. T. Rama Rao, Dr. Ashutosh Narayan, Er. Ajay Tiwari, Shri Ramesh Tiwari, Shri Mahesh Sahu, Shri D. Katre, and Shri S. Rahim.

I am extremely thankful to the people of Kourikasa and particularly the Kunjam family who agreed on the request of my Guide to provide the body fluids for various analyses and who came to Bhilai for variety of analyses. National and international media had given prominent coverage to many of our findings and I am thankful to them for generating awareness in people by wide dissemination of the data obtained by our Lab.

I owe a great debt of gratitude for the immense care; my family has always provided to me and have always stood by me in good and bad times. Nevertheless, the person I must specially mention is my mother, who has left lasting imprints in my mind for her tender care and support.

-Sushma Yadav
