ACKNOWLEDGEMENTS

I feel besieged to spell few names those were the source of inspiration behind this research work and their help and support made me to accomplish this demanding task.

First and foremost, with a profound sense of gratitude, I acknowledge the valuable scrupulous guidance rendered by my supervisor Prof. (Dr.) Rahul Rishi who has not been just a guide but also an inspiring teacher, an eminent academician and an incredible human being. It has been an honor for me to be his student. To me, he is not just the supervisor of my doctoral thesis but instead I look upon him as an architect of my academic destiny. Although it is very difficult to translate the feeling of regards and respect into words, yet I wish to extend my indebtedness to my supervisor whose motivating force behind me has given richness to my modest endeavor.

I would like to express my sincere thanks and immense gratefulness to Prof. (Dr.) S. P. Khatkar, Dean, Faculty of Engg. & Tech., Director, UIET, Maharishi Dayanand University, Rohtak for not only providing the infrastructure facilities but for his generous and erudite guidance and support. As the Director of UIET, he has created an environment which encourages work and research activities. I express my deep sense of gratitude to him for his everlasting inspirations and encouragement during my research work.

Over the last eleven years, I have been associated as a teacher as well as an ever learning student, with Maharaja Surajmal Institute, C-4, Janakpuri, New Delhi. My head bows in deep respect and humanity to this great institution which has shaped many young minds and nurtured seed of intelligence in others. I have been among those fortunate and blessed ones who have received a lot from this institute, least of which is high quality teaching experience and the most of which are the values that will inspire me for a lifetime. I would like to take this opportunity to extend my deep sense of gratitude and indebtedness to Sh. S. P. Singh, Chairman, Surajmal Memorial Education Society,
Janakpuri, New Delhi, who is the motivation force and the source of inspiration for us and the pillar of strength behind the success story of this institute.

I want to extend my special thanks to Prof. (Dr.) Azad S. Chhillar, Director, Maharaja Surajmal Institute, for his encouragement and guidance throughout the research work. I am also thankful to the faculty members, non-teaching staff and library staff of UIET, Maharashi Dayanand University, Rohtak and Maharaja Surajmal Institute, Janakpuri, New Delhi for their help throughout the research work.

I acknowledge the continuous motivation and brotherly support provided by Dr. Pushpander Kadian and Dr. Sumeet Gill from the beginning of the research work. I am highly thankful to Dr. Vijaypal Singh Dhaka for encouraging me to pursue research.

I wish to extend my very special heartiest gratitude towards my mother, Late Smt. Sushila, for giving me the best of everything throughout my life. I also thank my father Sh. Mohinder Singh for his continuous support and encouragement during the research work. I am sure, today, no one would be as proud as him, seeing me completed my doctoral thesis. I am also thankful to my sisters Ms. Ritu and Ms. Garima, for their support. I am also thankful to my father-in-law Late Sh. Satvir Singh and my mother-in-law Smt. Ved Kaur for their unwavering support and encouragement.

I would like to express my gratitude to my wife, Savita for her patience and understanding. I cannot forget the gloomy face of my son Aaditya, who has been deprived of love and care for which he deserved. My younger daughter, Anushka was born a year back. Her innocent act worked as refreshing agent. I appreciate both Aaditya and Anushka, for their refreshing vibes every time I was all exhausted.

Last but not the least, I am thankful to God who has always been the invisible divine force behind my achievements and I hope that He will continue to do so forever...

(Amit Choudhary)
