List of Tables

Table 4.1: MRA filter coefficients of the designed wavelet ........................................ 64

Table 5.1: SNR values of MST radar signal with different decomposition levels .......... 72

Table 5.2: Threshold values of MST radar Doppler echo using standard threshold .... 73

Table 5.3: Best threshold values to MST radar data ................................................. 74

Table 5.4: SNR values using both hard and soft thresholding .................................. 74

Table 5.5: Best threshold values to simulated data .................................................. 75

Table 5.6: SNR values of simulated stronger and weaker Doppler echoes ............... 77

Table 5.7: SNR values of MST radar stronger and weaker Doppler echoes ............... 79

Table 7.1: Mean and standard deviations of derived parameters computed over 10 sets of identical simulated profiles at different altitudes ................................................. 95

Table 8.1: Mean and standard deviations of derived parameters computed over 10 sets of Experimental profiles in 10° East beam direction at different altitudes ............ 107
