ACKNOWLEDGEMENT

The research work presented in the thesis is an outcome of many discussions I have had with my learned supervisor Professor S. K. Singh. He is the only who has introduced me to the topic I have worked and has taken so much pain in giving me a right direction during the process of making this research a meaningful work. As it so often happens, there were many moments of despondency in this long process, but he gave me courage. I am deeply grateful to him for his valuable time spent for discussions and faith shown in his me. The critics and his constructive comments have made the path an easy task.

I am very much beholden to Prof. Gaurishankar, Head, SOS in Statistics, Pt. Ravi Shankarshukla University, Raipur for his encouragement and kind cooperation in all providing all the necessary facilities required for research.

The completion of my work could have not been possible without the cooperation and continuous source of strength provided by my seniors colleagues, hence my sense of gratitude towards Dr. A. K. Jha (Reader), Dr. Alpanaram (Reader), Dr. Jaya Dwivedi (Lecturer) Inst. of Pharmaceuticals Sciences, Dr. Anurag Srivastava (Lecturer) Information Technology, G. G. University, Bilaspur (C.G.) and Mr. Sanjay Daharwal (Lecturer) Dept. of Pharmacy, Pt. Ravishankar University, Raipur (C.G.).

Last but not the least, the affection, encouragement, and cooperation of my parents, sister, brother, bhabhi, my wife and my sweet daughter Riddhi have given my a real inner strength to start, conduct & complete this study and without their help it would have been an impossible task. Thanks are due to one and all who have assisted directly or indirectly, willingly or involuntarily and who may have escaped a mention.

Praveen Kumar Shrivastava
