ACKNOWLEDGEMENTS

In the name of Allah, the most beneficent, most merciful.

All praise be to the Almighty creator of the heavens and earth, His mercy surrounding all and His knowledge encompassing all and His Will be done.

I begin with the name of my Creator and hope that I shall be able to do justice to the enormous responsibility that comes with the numerous gifts. Each time that I felt I couldn’t go on one step further, Almighty has provided support for me from sources I couldn’t ever imagine. All through this journey, He has been with me and I can simply pray that He shall be always there for me throughout my life.

I would like to use this space here to say thanks to my parents. The thanks that often were not offered but were due always. My parents have always stood by me throughout the thick and thin of life, bearing all good and bad from me with their unending love and tolerance. I am honored to have been born in their family and to be their daughter. Alhamdulillah!

My eldest sister, Dr. Shaista Urooj has been a source of inspiration and support as always. Forever ready to steady the boat with encouraging words and belief in me. Her positive attitude has helped me more than I can remember to thank her for.

My elder sister, Ms. Sakeena Arshi has been a pillar of strength and support. My alter ego who has more confidence in me than I, myself. She has always stood by me through thick and thin in life. Thank you Arshi apa. She has taught me a lot in forbearance and fortitude and shown me by example a lot of stuff that I would reflect upon even today.

My brother-in-law, Dr. Umar Jehangir has helped me with advice and technical matters that would otherwise be unavailable to me.

All through the time of this research, my nieces and nephews Yusuf, Elsa, Mariyam and Mustafa have been a constant source of entertainment and joy to me.

This thesis cannot be complete without Hasnain, my spouse, my best friend, critic, sounding board, trouble shooter and solution finder! Thank you Hasnain! For standing by me when others left, for the innumerable sacrifices that you made, for
your patience, for being there always, for believing in me when I doubted myself, for
never letting me go and for Ahmed!

Here I come to my bundle of joy, my son Ahmed who despite his tender age is
a pillar of patience and forgiveness. My constant source of encouragement and
inspiration to finish my research. Thank you beta!

This research started with the blessings and guidance of Prof R.K.Khar who
was always present with solutions and troubleshooting tactics. His motivation and
positive attitude has reflected itself in this work. His organized and methodical
manner of approaching and solving problem is an example in itself. He has spent
precious time in supervising and revising my project, reviewing and re-writing to give
it this shape.

I would also like to thank Dr. Farhan J Ahmad for his valuable guidance;
timely criticism and encouragement, which instilled an immense confidence in my
research right from identification of the project to accomplishment of the target.

I am grateful to Prof. Mushir Ali, Officiating Dean, Faculty of Pharmacy and
my Co-guide for his able guidance, suggestions and constructive criticism. He has
been a source of encouragement to me throughout the research.

It is an honor to name Dr. Abdul Jabbar in this thesis. He has been always
there for me with the right solution to most problems, adding ancient wisdom to the
scientific approach and always coming out a winner with his answers. Thank you Sir!

Dr. Zeenat Iqbal as my technical and moral support switch board who has
been in service for the past 10 years answering my distress calls without flinching at
all times without fail!

I cannot forget to thank Dr. Sayeed Ahmad for the numerous times he took
time out of his busy schedule to answer my queries, solve my HPTLC problems.

I wish to thank Dr. M Tauseef, Dr. MM Alam, Dr. Shaqeequzzaman, and Dr.
Zia Rahman for being there with me at ground zero always and giving me the expert
advices and invaluable suggestions. Their cooperation and consideration has been a
boon to me.
Dr. Faiyaz Shakeel, Dr. Shahid Jameel, Dr. Md Khalid Anwer, Dr. Md Shah Faisal, Dr. Md Rizwan, Dr. Adnan Azeem, Mohd. Aamir Mirza, Ghulam Mustafa, Abdul Ahad, who have always been there to lend an ear to me and offer help.

I would also like to acknowledge the help extended to me by Aabid bhai and Mushtaq bhai in the CIF. Thank you Sohrab bhai, for the access to animal house of Dept of Pharmacology and extended support all through the animal studies.

I extend my thanks to Prof. Mohammed Ali for his interpretation of FT-IR spectra. Also I wish to thank Prof. Pillai for allowing me exclusive use of the animal house of the Deptt. of Pharmacology.

I also thank Prof Rasheeduz Zafar for his cooperation and also for providing me timely help and information and who has been a constant source of inspiration and encouragement.

Fatima Hasan
