## 2. Review of literature | 12

### 2.1 Back ground information on *Picrorhiza kurrooa* | 12

#### 2.1.1 Habit and Habitat | 12

#### 2.1.2 Medicinal uses | 12

Table 2.1 Commercial preparations with *P. kurrooa* | 13

#### 2.1.3 Chemistry of *Picrorhiza* genus and *P. kurrooa* | 14

Table 2.2 Chemical constituents of *Picrorhiza* genus | 15

Figure 2.1 Chemical constituents characterized in *Picrorhiza* genus | 26

#### 2.1.4 Trade of Non Timber Forest Products (NTFPs) including

*P. kurrooa* from Nepal | 57

Table 2.3 Top 10 exporters of medicinal plants to the world in 2009 | 56

Table 2.4 Contribution (Value, 000 NRs.) of NTFPs including MAPs to the total export from Nepal | 57

Table 2.5 National collection and sales figure based on royalty (Forest revenue) records of *P. kurrooa* from Nepal | 57

#### 2.1.5 Status of *P. kurrooa* as threatened medicinal plant species | 57

#### 2.2 Chemical screening of the natural populations of *P. kurrooa* for

assessment of its bioactive marker constituents-picroside-I and kutkoside | 58

Inferences drawn from review of literature | 60

Aims and Objectives of the present work | 61

Rationale for selection of the medicinal plant species | 61

References | i
3. **Materials and Methods**

3.1 Experimental

3.1.1 Site selection and study area

Figure 3.1 Map of Nepal showing district wise distribution boundaries

3.1.2 Collection of plant material

Table 3.1 Details of the sites selected for collection of the rhizomes

Table 3.2 Details of the *P. kurrooa* accessions collected from different altitudes

3.1.3 Preparation of herbarium and authentication of the plant species

Figure 3.2 Herbarium of *P. kurrooa* plant

3.1.4 Chemicals and Reagents

3.1.5 Spray reagents and mobile phase for CC and TLC

3.1.5.1 Spray reagents used

3.1.5.2 Solvent used for column chromatography

3.1.5.3 Solvent system used for TLC

3.1.6 Instruments used

3.1.7 Isolation and characterization of kutkoside and picroside-I from the rhizomes of *P. kurrooa*

3.1.7.1 Extraction of the rhizomes

3.1.7.2 Solvent fractionation of methanol extracts

3.1.7.3 Examination of ethylacetate extracts

3.1.7.4 Compound Picroside-I and Figure 3: Picroside-I

3.1.7.4.1 IR Spectroscopy examination of Picroside-I

3.1.7.5 Compound: Kutkoside and Figure 4: Kutkoside (Picroside-II)

3.1.7.5.1 IR Spectroscopy examination of kutkoside

3.1.8 HPTLC analysis of *P. kurrooa* accessions and quantitative determination of picroside-I and kutkoside

3.1.8.1 Preparation of extracts

3.1.8.2 Standard and sample preparation

3.1.8.3 Chromatography
3.1.8.4 Method Validation
3.1.8.5 Quantitative determination of picroside-I and kutkoside
3.2 Statistical analysis

References

4. Results and Discussions

Table 4.1 Method validation parameters for quantification of picroside-I and kutkoside
Table 4.2 Intra-day and inter-day precision study of picroside-I and kutkoside
Table 4.3 Recovery study of picroside-I and kutkoside
Figure 4.1 HPTLC chromatogram of *P. kurrooa* extracts
Figure 4.2 HPTLC chromatogram of reference standard Kutkoside (a) and Picroside-I (b)
Figure 4.3 HPTLC plate photo under UV 254 nm showing different tracks 1-3, sample extracts; 4-6, standard Kutkoside, 7-9, standard Picroside-I
Figure 4.4 UV absorption spectra obtained from Kutkoside (a) and Picroside-I (b) reference standard
Figure 4.5 Calibration plot obtained by linear regression analysis for Kutkoside (a) and Picroside-I (b)
Figure 4.6 Overlaid UV absorption spectra obtained from reference standard Kutkoside (a) and Picroside-I (b) and corresponding peaks from *Picrorhiza kurrooa* extract
Figure 4.7 Kutkoside in all the sample extracts were determined from the assay experiments carried out with the reference standards and the extracts
Figure 4.8 Picroside-I in all the sample extracts were determined from the assay experiments carried out with the reference standards and the extracts
Table 4.4 Content (%) of Picroside-I, Kutkoside and Kutkin
Table 4.5 Chemically superior accessions of *P. kurrooa*
