LIST OF TABLES

Table

1. Showing the significance of difference on t-test between the means of quality of working life scores (QWL) of Group-1 (White-collar workers) and Group-2 (Blue-collar workers).

2. Showing the significance of differences on t-test between the means of absenteeism rate of Group-1 (White-collar workers) and Group-2 (Blue-collar workers).

3. Showing the F-values of the Group-1 (WCWs) and Group-2 (BCWs) on multiple regression analysis.

4. Showing the correlation coefficients between the eight components of QWL and absenteeism rate of Group-1 (WCWs) and Group-2 (BCWs).

5. Showing the inter-correlation matrix of the eight components of QWL in case of Group-1 (WCWs).
6. Showing the inter-correlation matrix of eight components of QWL in case of Group-2 (BCWs).

7. Showing the significance of differences on t-tests between mean scores of eight components of QWL of Group-1 (WCWs) and Group-2 (BCWs).
